Qowa — Product & Business Blueprint

A unified fitness & coaching ecosystem for gyms, coaches and trainees — Egypt first, Saudi Arabia / GCC next

Document	`PRODUCT_BUSINESS_BLUEPRINT.md` (companion: `TECHNICAL_SYSTEM_ARCHITECTURE.md`)
Version / date	v1.0 — 22 October 2026
Status	Research & planning baseline. No code. Decisions marked **[DECISION]** are proposed and need founder sign-off (§18).
Brand	**Qowa** (قوّة, "strength"). Domain `qowa.app`; support `support@qowa.app`, `+20 155 544 0882`. Trademark registration (Egypt ITDA, Saudi SAIP) **not yet checked**.
Currency	Egyptian pounds (EGP) unless stated. USD conversions use **52.5 EGP/USD** (bank quotes were ~52.7–52.8 on 13 Oct 2026 [S21]); SAR is pegged at 3.75/USD → **14.0 EGP/SAR**.

How to read this document

Every important statement carries one of these labels:

Label	Meaning
[FACT]	Verified from a cited source (source IDs `[Sxx]` are listed in Appendix A with dates). Most sources were reached through web search on 22 Oct 2026; vendor pages are self-reported.
[VENDOR CLAIM]	Stated by a company about itself; not independently verified.
[ASSUMPTION]	A working input chosen by us. Change it and dependent numbers change.
[ESTIMATE]	A calculated number derived from assumptions (calculation shown).
[RECOMMENDATION] / **[DECISION]**	Our proposed choice, with the reason.
[VERIFY]	Must be confirmed (legal, pricing, vendor capability) before it becomes a commitment.

Research limits: the reference site `supercoach.me` and most vendor pricing pages could not be opened directly from the research environment (DNS/egress blocked); facts about them come from search-indexed copies, vendor blog posts and app-store listings. Treat all competitor pricing as indicative and re-check before using it in sales material.

Appendix B — Financial model inputs

0. Shared vocabulary

Both documents use these terms the same way. The technical document maps each one to tables and services (Technical §5, §8).

Term	Meaning
Person	One human, one login. A Person can be a trainee, a coach, a gym owner and a receptionist at the same time.
Personal Space	The private workspace every Person gets for free. It owns their workouts, body metrics, nutrition diary, progress photos and health answers — whoever helped create them.
Organization (Org)	A business tenant. `type = gym` or `coaching_business`. A solo online coach is a coaching business with one staff member.
Branch	A physical location of a gym Org. A coaching business has one virtual branch.
Staff Assignment	A Person's role inside an Org (owner, manager, branch manager, receptionist, trainer, nutritionist, sales), optionally limited to some branches.
Client Relationship	A Person as a customer of an Org. Two kinds: **Gym Membership** (contract to use a gym) and **Coaching Engagement** (a client working with a coach under a package).
Data Access Grant	A consented, scoped, time-boxed, revocable permission for an Org (and the staff assigned to that client) to read or write parts of a Personal Space.
Platform Subscription	What a Person or an Org pays *Qowa*: Trainee Plus, Coach Starter/Pro/Team, Gym Essentials/Growth/Pro.
Entitlement	A feature or limit a Person or Org may use, computed from Platform Subscriptions plus Sponsored Entitlements.
Sponsored Entitlement	A feature an Org gives its clients (e.g. a coach's clients get full logging; a gym's members get the member app).
Offering	What an Org sells to its own clients: membership plans, class packs, PT packages, coaching packages, products, digital programs.
Merchant Collection	Money an Org collects from its clients. Three modes: **Recorded** (cash/InstaPay/POS outside the platform, recorded in it), **Connected Gateway** (the Org's own gateway account), **Platform Checkout** (Qowa-operated checkout with split/payout, marketplace only, Phase 3).
Marketplace	Public discovery: Public Profiles, Listings, reviews, Platform Checkout.
Program Template / Assigned Program	A coach's reusable plan (the Org's intellectual property) vs. the copy delivered to a client (lives in the client's Personal Space, with provenance).
Progress Check-in	The coaching ritual (weekly form, weight, photos, feedback). Not to be confused with a **Gym Visit** (door check-in/attendance).
Session	A booked time slot: **PT Session** (1:1), **Class Session** (one occurrence of a group class), **Consult** (online call).
Commission Rule / Trainer Earnings / Payout	How a trainer is paid per session/sale, the resulting statement lines, and the money transfer.
Launch month L1	First month the Coach MVP is sold. Roadmap and forecasts count months from here (L1…L24). The build before it is P0 + P1 (≈ 6 months).

1. Executive summary and product vision

1.1 Vision

Every Arabic-speaking trainee gets a lifelong training record they own; every coach and gym gets the tools to run and grow their business around that record.

Most products in this space pick one customer: gym software (front desk, contracts, POS), coaching software (programs, check-ins, chat) or consumer apps (logging, calories). In Egypt and the Gulf the three overlap in daily life: a member trains at a gym, buys PT sessions from a freelance trainer who rents floor time there, follows an Instagram coach's nutrition plan, and logs workouts in a separate app. Data is scattered across WhatsApp chats, PDFs and spreadsheets, and the trainee loses it every time they change coach or gym.

Qowa joins these three around one idea: **the trainee owns their Personal Space; businesses get scoped, consented access to it while they serve that trainee.** That one rule settles most of the hard questions — data ownership, coach switching, gym exits, privacy law, marketplace trust — and it is the main thing that sets the product apart (§14).

1.2 What we recommend building, in order

#	Recommendation	Why
1	**[DECISION] Beachhead = independent online coaches in Egypt** (Coach OS + Trainee app), launched after ~6 months of build.	Self-serve sales, short sales cycle, each paying coach brings 10–50 trainees into the app (supply + demand for later phases). Gym sales cycles are longer and need front-desk, POS and contract depth that is not needed to prove the core.
2	**Gym OS from L7** (design partners from L5): memberships, front desk QR check-in, classes, PT packages and trainer commissions, POS-lite, WhatsApp reminders.	Higher revenue per customer (~2,400 EGP/month vs ~650 for a coach) and lower churn; reuses the trainee app as the member app. The wedge is **the gym's PT business** (in-house + freelance trainers), which local gym tools handle poorly.
3	**Marketplace from L10**, once there are ≥ 300 coaches with public profiles in Greater Cairo/Alexandria.	A marketplace without supply fails. Supply arrives as a by-product of steps 1–2.
4	**Saudi Arabia from L16** through a channel partner, with SAR pricing, mada/Apple Pay via a Saudi gateway and ZATCA-compliant invoicing.	Saudi revenue per customer is ~2–3× Egypt's; Arabic product and content carry over. The timing allows for the planned AWS Saudi region (targeted Dec 2026 [S36]) and legal work.
5	**Trainee Plus (B2C) as a funnel, not a revenue pillar.**	Willingness to pay for self-tracking in Egypt is low. In the base case Plus is ~1% of L24 revenue; its job is to keep ex-clients and organic users in the ecosystem.
6	**AI, wearables, video, white-label later (Phase 3–5)**, each behind a clear trigger (§13.4).	They add cost and risk without proving the core. Competitors' AI is mostly "draft a workout" [S54].

1.3 Business model in one table

Revenue stream	Who pays	Start	Share of L24 revenue (base)
Coach subscriptions (Egypt)	Coaching businesses	L1	42%
Gym subscriptions (Egypt)	Gyms	L7	27%
Saudi coaches + gyms	Saudi businesses	L16	23%
Marketplace commission (10% of marketplace-originated sales)	Coaches/gyms, deducted at payout	L10	7%
Trainee Plus	Trainees	L10	1%

1.4 Headline numbers (base scenario, all **[ESTIMATE]**, details in §12)

Metric	L12	L24
Paying coaches (Egypt + KSA)	~296	~992
Paying gyms (Egypt + KSA)	~29	~183
Monthly active users (all apps)	~12k	~55k
Net monthly revenue (after VAT)	~245k EGP (~$4.7k)	~1.23M EGP (~$23.4k)
ARR run-rate	~$56k	~$281k
Gross margin	~72%	~80%
Monthly EBITDA	−386k EGP	+74k EGP (break-even month ≈ L24)
Peak cash need incl. 6-month build	—	~9.0M EGP (~$172k)

A **lean variant** (founder writes the backend, smaller team until L10) breaks even at about **L20** with a peak cash need of about **4.7M EGP (~$90k)**. The conservative scenario does **not** break even within 24 months; §12.7 sets stop/pivot triggers.

1.5 Technology and infrastructure in one paragraph

A **modular monolith** in **Laravel 13 / PHP 8.4** with **PostgreSQL** (RDS), **Valkey** (ElastiCache) and **Laravel Reverb** WebSockets; a **Nuxt 4** web app (SPA for the dashboards, server-rendered public pages for SEO); one **Flutter** mobile app with role modes (trainee and coach); **ECS Fargate (ARM)** in **AWS eu-central-1 (Frankfurt)**, CloudFront with its Cairo edge, backups copied to eu-south-1 (Milan). Production starts at **~$245/month** of AWS spend and reaches **~$1,000–1,200/month** at ~30k monthly active users (Technical §15). The Gulf AWS regions are *not* recommended as primary hosting in 2026: after strikes in March–April 2026, AWS said in September that resources hosted only in its Bahrain region cannot be restored, and its UAE region lost an availability zone [S37]. Hosting Egyptians' data abroad needs a cross-border transfer licence from Egypt's data protection regulator — a **blocking legal dependency** (§16, Technical §16).

2. Market research and competitor analysis

2.1 Egypt — context that shapes the product

Topic	What we know	Product implication
Gyms	Business directories count **~8,000 "gyms"** (Jul 2026) or **~10,000 gyms and studios** (Mar 2025) in Egypt [S19] **[FACT, low precision]**. No official licensing count was found.	Serviceable market for gym software is in the thousands. Our base case reaches ~158 Egyptian gyms by L24 (~2% of directory count).
Gym prices	Cairo monthly memberships range from ~EGP 750 to EGP 5,000; annual Gold's Gym EGP 6,500; F45 EGP 4,000–5,000/month [S17] **[FACT, secondary]**. Average business-district gym ~EGP 1,261/month (Sep 2025) [S18].	A 400-member mid-tier gym turns over roughly 400–600k EGP/month; a 1,000–2,000 EGP/month software bill is < 0.5% of revenue.
Online coaching	No reliable published EGP price list was found **[GAP]**. Instagram coaches commonly sell monthly packages. We **assume** 1,000–3,000 EGP/month for online coaching and use 1,800 EGP as the average marketplace order (§12).	Validate in discovery interviews (P0) before final pricing.
Payments	Paymob standard online rate **2.75% + EGP 3**, no monthly fee [S23]; Apple Pay live since Dec 2024 [S22]; InstaPay widely used for person-to-business transfers; wallets (Vodafone Cash etc.) common. Recurring card charges are possible (Paymob Subscriptions) [S23] but many users pay by transfer.	Billing must support **prepaid periods with reminders** as the default, auto-renew as an option, and **manual InstaPay proof upload** with admin approval.
Messaging	WhatsApp is the default business channel. Meta charges ≈ $0.0036–0.0054 per utility and ≈ $0.064–0.077 per marketing message in Egypt; service replies start being charged on 1 Oct 2026 [S34] **[FACT, sources disagree]**.	Use free `wa.me` click-to-chat links for staff-initiated messages; use paid templates only for automated utility messages (renewal reminders, booking confirmations). Pass marketing messages through at cost.
Data protection	Law 151/2020 and its Executive Regulations (Decree 816 of 2025, published ~Nov 2025, one-year grace to ~Nov 2026) [S27]. **Health, biometric, financial and children's data are "sensitive"** [S28]. Processing sensitive data and transferring data abroad (including *storing* it abroad) require licences from the Personal Data Protection Centre [S27][S29].	Consent flows, licences and data minimisation are launch requirements, not polish (§16, Technical §16).
Tax	VAT 14%. B2C e-receipts are being phased in by named taxpayer lists (e.g. Decision 361 from 15 Nov 2025) [S32].	Platform invoices for our own SaaS must be ETA-compliant once we are in scope; gyms may need e-receipts for their own sales (integration in Phase 4 or via partner).

2.2 Saudi Arabia — context

Topic	What we know	Implication
Market leader	Leejam (Fitness Time): **239 centres (227 KSA), 468k members** at end-2025 [S20] **[FACT]**.	Chains build their own stack; our Saudi target is independent gyms, studios, PT studios and online coaches.
Policy tailwind	Vision 2030 targets 40% of the population being physically active by 2030 (older sources) [S20]. Women's gyms licensed since 2017.	Women-only gyms and female coaches are a distinct segment (gender filters, privacy defaults for photos).
Local competitors	Gym tools stress **ZATCA QR tax invoices, mada, Apple Pay, Tabby/Tamara** [S14] **[VENDOR CLAIM]**.	ZATCA e-invoicing and mada are table stakes for Saudi launch.
Payments	Stripe does not list Saudi Arabia for account creation (Dec 2025 guide) [S25]; Moyasar (SAMA-licensed; mada, Apple Pay, STC Pay, recurring incl. mada) and Tap (licensed across GCC) are the realistic options [S26].	Gateway abstraction from day one (Technical §11).

Topic	What we know	Implication
Data	Saudi PDPL in force; transfers abroad allowed with safeguards (SCCs, risk assessment); legitimate interest does not cover sensitive (health) data [S30].	Explicit consent for health data; transfer safeguards documented; optional Saudi hosting cell later.
Cloud	AWS Saudi region targeted for **December 2026** [S36].	Allows a Saudi hosting cell in Phase 4 if a customer or regulator requires it.

2.3 The reference product: SuperCoach (supercoach.me)

Aspect	Verified	Source
Company	Built by **ElCoach, Inc.**, a Cairo-founded company that first ran an Arabic consumer coaching app (ElCoach, seed-funded 2020, targeting Egypt and KSA).	[S3][S4] **[FACT]**
Product	SaaS for personal trainers and "sports facilities": trainer dashboard + trainee mobile app; custom workout programs, meal plans, automated check-ins and scheduling, in-app messaging, multi-coach/branch management.	[S1][S2] **[VENDOR CLAIM]**
Market	Middle East focus, Egypt and Saudi Arabia; Arabic UI; iOS, Android and web; "no credit card required", "unlimited clients".	[S1][S2] **[VENDOR CLAIM]**
Scale claims	"35,000+ clients, 12+ countries".	[VENDOR CLAIM], unverified
Pricing	Vendor's own posts: **Essential $19/month (up to 10 clients), Growth from $45/month (>10 clients, rises with clients), Elite+ custom (>1,000 clients)**. Posts are inconsistent.	[S1] **[VENDOR CLAIM]**
Not found	Gym front-desk features (contracts, freezes, door access, POS), a public trainer marketplace with checkout, trainee-owned data portability, B2C subscription.	**[ASSUMPTION — absence of evidence, not evidence of absence]**; verify with a demo account in P0.

What to learn from it: an Egyptian team has already proven that Arabic-first coaching software sells in Egypt and KSA and that coaches will pay in USD-equivalent prices. **Where it is exposed:** USD pricing ($19–45 ≈ 1,000–2,360 EGP) is heavy for the long tail of Egyptian coaches; it is coach-centric (the trainee's data belongs to the coach's account); and it does not appear to own the gym operating system or a marketplace. Our positioning (§14) attacks exactly those three points.

2.4 Competitor landscape

Prices in USD per month unless noted; all third-party or vendor-reported, **[VERIFY]** before use.

Product	Segment	Price signal	Strengths	Gaps relevant to us	Src
SuperCoach	MENA online coaches, some facilities	$19 (10 clients), $45+	Arabic, Egypt/KSA presence, coach + trainee apps	Gym ops, marketplace, EGP pricing, trainee data ownership (unverified)	[S1] [S2]
ElCoach (consumer)	Arabic B2C coaching	SAR 56/month, SAR 206/year (coupon sites)	Brand in Egypt/KSA B2C	B2C only; different model	[S3] [S4]
ABC Trainerize	Global coaches, studios	Free (1 client), Pro from ~$22–23 (5 clients), Studio Plus ~$248/location; branded app $169 setup; nutrition/payments/video add-ons	Mature, branded apps, integrations	English-first, add-on creep, USD	[S5]
TrueCoach	Global coaches	~$26–30 (5), ~$58 (20), ~$137 (50); no free tier	Simple, coach-loved	No nutrition depth, no gyms	[S6]

Product	Segment	Price signal	Strengths	Gaps relevant to us	Src
Everfit	Global coaches/studios	Free (5 clients), Pro ~$19 (5) → ~$290 (300); add-ons for payments, automation, meal plans	AI workout builder, automation	Add-on costs, English-first	[S7] [S54]
Hevy Coach	Coaches with Hevy-logging clients	Low	Excellent logging UX	Light business tooling	[S54]
Mindbody	Studios/gyms (US/global)	$99–139 → $699 + add-ons, long contracts	Marketplace (consumer app), payments	Expensive, not localised	[S9]
ABC Glofox	Boutique studios/gyms	€220–515/month (2026 page)	Branded apps, class booking	Price, no Arabic	[S8]
PushPress	Gyms (CrossFit-style)	Free tier (higher processing), $159, $229	Free entry via payments margin	US-centric payments	[S10]
Gymdesk	Small gyms/martial arts	$75–200 by members	Transparent pricing	No Arabic, no MENA payments	[S11]
GymFlow (Egypt)	Egyptian gyms	"From ~500 EGP/month"	Arabic, QR attendance, WhatsApp workflows	Coaching/marketplace absent (vendor page)	[S12]
ArabGym	MENA gyms	30-day trial	Arabic, KSA/UAE/Egypt	Coaching absent (vendor page)	[S13]
IDS Fitness / Gymsly / Easy Gym	Saudi gyms	Quote	ZATCA QR, mada, BNPL	Coaching/marketplace absent	[S14]
Enhance Fitness, HeyTrainer, FitLov	GCC PT booking marketplaces	Commission/packages	Demand generation	Not a business OS; UAE-centric	[S15] [S16]

2.5 Gaps and opportunities

1. **Nobody local joins gym operations, coaching and the trainee's own record** in one Arabic-first product (verified only to the extent vendor pages describe their scope).
2. **The gym's PT floor is unmanaged.** Egyptian gyms commonly host freelance trainers (floor fees, revenue splits) and in-house trainers on commission. Calculating trainer pay, preventing "off-book" sessions and giving the gym visibility are recurring pains **[ASSUMPTION — validate in P0 with ≥ 15 gyms]**.
3. **Payments as Egyptians actually pay**: InstaPay transfers with screenshots, wallets, cash at the desk, card links. Global tools assume card-on-file recurring billing.
4. **Coach switching and data portability**: trainees lose history when they leave a coach; coaches fear losing clients to gyms and vice versa. Clear, contractual data rules (§9.5) reduce both fears.
5. **Local food data**: Egyptian and Gulf dishes (koshari, ful, molokhia, kabsa) are poorly covered by global food databases **[ASSUMPTION]**. A curated, dietitian-reviewed local food list is a moat that compounds.
6. **Price**: USD-priced tools are expensive for the Egyptian long tail; EGP pricing with a free tier wins the bottom of the funnel.

2.6 What the research could not establish (open)

- Actual distribution of Egyptian coaches' client counts and prices — **P0 interviews (30 coaches)**.

- How many Egyptian gyms already pay for software and how much — **P0 interviews (15 gyms) + GymFlow/ArabGym demos**.
- SuperCoach's real feature depth on facilities and data portability — **demo account in P0**.

3. Customer personas and jobs-to-be-done

ID	Persona	Context	Jobs-to-be-done ("When ..., I want to ..., so I can ...")	Pays?
P-01	**Karim, independent gym owner** (Nasr City, 1 branch, 450 members, 6 staff, 4 freelance PTs)	Runs on a desktop app + Excel + WhatsApp; cash leaks at the desk; doesn't know which trainers bring revenue	When members' subscriptions expire, I want them reminded and renewed without my receptionist chasing them, so cash flow doesn't depend on her memory. When trainers sell PT, I want every session recorded and the gym's share calculated, so I'm not cheated.	Gym Growth
P-02	**Mona, operations director of a 5-branch chain** (Cairo/Giza)	Branch managers report differently; members want to use other branches	When I review the week, I want comparable numbers per branch and per trainer, so I can act on underperformers.	Gym Pro
P-03	**Hassan, branch manager**	Owns targets, staff rota, class schedule	When a class fills, I want waitlisted members promoted automatically, so the class is full and I avoid complaints.	(staff)
P-04	**Salma, receptionist**	High volume at peak hours, works on a tablet	When a member arrives, I want to scan their QR and immediately see whether they may enter (expired, frozen, owes money), so the line keeps moving.	(staff)
P-05	**Omar, in-house trainer** (salary + 30% PT commission)	Sells PT packages to members	When I finish a session, I want it confirmed by the client in one tap, so my commission is counted and disputes disappear.	(staff)
P-06	**Youssef, freelance trainer renting floor time** in two gyms + online clients	Pays each gym a monthly fee or per-session fee	When I manage clients across two gyms and online, I want one schedule and one client list, so I don't double-book and I keep my clients if I change gyms.	Coach Pro (own business)
P-07	**Nour, online coach** (Instagram 40k followers, 35 clients, female clients)	WhatsApp + Google Sheets + PDF meal plans; spends Sundays on check-ins	When my weekly check-ins arrive, I want them in one review queue with photos side by side and trends, so I finish in 2 hours not 8. When clients pay via InstaPay, I want renewals tracked, so I stop losing money.	Coach Pro
P-08	**Ahmed, owner of a coaching team** (4 coaches, 150 clients, Egypt + KSA clients)	Needs to assign clients, share templates, control quality	When a lead arrives, I want it routed to the coach with capacity, and I want to see each coach's response times and retention.	Coach Team
P-09	**Dina, gym member** (28, trains 4×/week)	Member of one gym, follows an online coach for nutrition	When I train, I want my gym's class bookings, my coach's program and my own logs in one app, so I don't juggle three apps.	Free (sponsored) / Plus
P-10	**Mostafa, self-trainee** (22, student, home + public gym)	Price-sensitive, uses free apps	When I train alone, I want a free logger in Arabic with Egyptian foods, so I can track progress without paying a coach.	Free; maybe Plus
P-11	**Reem, coached client in Riyadh**	Works with an Egyptian coach online	When I pay for coaching, I want to pay with mada/Apple Pay in SAR and get my plan in the app.	Client of coach
P-12	**Visitor looking for a coach**	Searches "كوتش أونلاين للتخسيس"	When I'm choosing a coach, I want verified certificates, real reviews and clear package prices, so I'm not scammed.	Marketplace buyer
P-13	**Platform support agent**	Handles onboarding, billing proofs, disputes	When a coach uploads an InstaPay proof, I want it matched to the invoice in one screen.	(internal)
P-14	**Parent of a 15-year-old gym member**	Minor's membership	When my child joins, I want to consent to what data is kept and see their bookings.	Pays the gym

4. Complete functional feature inventory

Phases: **P1** Coach MVP (to L1), **P2** Gym Core (L2–L7), **P3** Marketplace & Growth (L8–L15), **P4** GCC & Scale (L13–L24), **P5** Expansion (after L24 or on trigger). Phase content and acceptance criteria: §13 and Technical §21. "Value" = the business reason the feature exists.

4.1 Platform-wide (PLT)

ID	Feature	Roles	Value	Phase
PLT-01	One account: phone OTP (WhatsApp/SMS), email + password, Google and Sign in with Apple; 2FA (TOTP) required for owners/managers	All	One identity across roles; security for money/health data	P1
PLT-02	Workspace switcher (Personal Space ↔ each Org where the Person has a Staff Assignment)	All	Multi-role people (coach who trains at a gym)	P1
PLT-03	Arabic/English, RTL/LTR, Latin digits by default for numbers and dates	All	Egypt/KSA usability	P1
PLT-04	Notification centre, push, email; WhatsApp utility templates; per-user preferences and quiet hours	All	Engagement and retention	P1
PLT-05	Consent centre: view/approve/revoke Data Access Grants per Org and scope	Trainee	Legal basis + trust	P1
PLT-06	Data export (JSON + PDF summary) and account deletion with retention rules	Trainee	Portability, law	P1 (export on request), P2 (self-serve)
PLT-07	Platform billing: plans, trials, invoices (VAT), card/wallet via Paymob, InstaPay proof upload + approval, coupons, credit balance	Owners	Revenue	P1
PLT-08	Org audit log (who changed prices, refunded, deleted, accessed client data)	Owners, managers	Fraud control, accountability	P1
PLT-09	In-app feedback, help centre (Arabic), client error reporting	All	Quality	P1
PLT-10	Platform admin console: Orgs, billing approvals, moderation, verification queue, support access with Org consent and audit	Platform staff	Operations	P1
PLT-11	Referral program (coach→coach credit; trainee→friend)	Coaches, trainees	Low-cost acquisition	P2
PLT-12	Partner/affiliate program (commission on referred paying Orgs)	Partners	KSA channel, influencers	P4
PLT-13	Public API + webhooks for Orgs	Chains, integrators	Enterprise deals	P5
PLT-14	Feature switches per Org (owner shapes the product) and platform kill switches	Owners, platform	Simplicity, safe rollout	P1

4.2 Module B — Coach business (COA)

ID	Feature	Roles	Value	Phase
COA-01	Onboarding wizard: business name, specialties, languages, currency, first package, branding colour/logo	Coach	Time-to-first-client < 30 min	P1
COA-02	Public coach page (SEO, share link/QR, packages, results gallery with client consent, "Request coaching" → lead + WhatsApp)	Coach, visitor	Free acquisition; seeds marketplace	P1

ID	Feature	Roles	Value	Phase
COA-03	Credentials upload; manual verification → "Verified" badge	Coach, platform	Marketplace trust	P1 upload, P3 badge
COA-04	Client invites (link, QR, WhatsApp), bulk import from CSV/Sheets	Coach	Fast migration	P1
COA-05	Intake & assessment forms (templates: goals, training history, injuries, readiness questionnaire, preferences, food dislikes); conditional questions	Coach, client	Personalisation; safety screening	P1
COA-06	Exercise library: ~300 platform exercises (AR/EN names, cues, muscles, equipment, demo video); custom exercises with own video	Coach	Content moat	P1
COA-07	Program builder: phases/weeks/days, blocks, supersets/circuits, sets × reps/time/distance, load/% 1RM/RPE/RIR, tempo, rest, notes; template library; duplicate and bulk edit	Coach	Core value	P1
COA-08	Assign programs with start date; automatic simple progression rules (+load/+reps per week)	Coach	Saves time	P1 assign, P2 progression
COA-09	Nutrition: macro/calorie targets, meal plans with alternatives, local food database, recipes, printable PDF	Coach, nutritionist	Most coaches sell training + nutrition	P1 basic, P2 recipes/swaps
COA-10	Progress Check-ins: scheduled forms (weight, measurements, photos, adherence, sleep, stress), review queue, side-by-side photo compare, text/voice feedback	Coach, client	Biggest time sink today	P1
COA-11	Client 360°: adherence, training volume, PRs, weight trend, photos, notes, payments, renewal date	Coach	Retention	P1
COA-12	1:1 chat: text, images, voice notes, short videos, read receipts, quick replies, attachments to workouts	Coach, client	Replaces WhatsApp for coaching	P1
COA-13	Packages: price, duration, inclusions (programs, nutrition, check-in frequency, calls), renewals, pausing	Coach	Monetisation	P1
COA-14	Payment tracking (Recorded mode): record cash/InstaPay/wallet payments with proof, receipts, balances, renewal reminders	Coach	"Stop losing money"	P1
COA-15	Connected Gateway: coach links own gateway account → payment links	Coach	Card payments without platform licence	P2
COA-16	Platform Checkout for coach packages (cards, wallets, Fawry, mada later) with payouts	Coach, client	Marketplace commerce	P3
COA-17	Scheduling: availability, 1:1 sessions in person/online, buffer, cancellation policy, reminders, calendar sync (ICS)	Coach, client	Hybrid coaches	P2
COA-18	Lead pipeline (new → contacted → consult → won/lost), sources, follow-up tasks	Coach	Growth	P2
COA-19	Business dashboard: active clients, revenue, renewals due, churn, check-in response time	Coach	Decisions	P1 basic, P2 full
COA-20	Teams: multiple coaches, client assignment and transfer, shared templates, per-coach permissions, quality metrics	Team owner	Coaching agencies	P2
COA-21	Group programs and community channels (cohorts, challenges)	Coach	Scale 1-to-many	P3
COA-22	Automations: welcome sequence, check-in reminders, inactivity nudges, renewal follow-ups	Coach	Time saving	P2
COA-23	Embedded video consults	Coach, client	Premium packages	P4
COA-24	Digital products (self-guided programs, e-books)	Coach	Passive income (store-policy constraints, §8.5)	P4

ID	Feature	Roles	Value	Phase
COA-25	AI drafting assistant (draft program/meal plan from intake; summarise check-ins); coach reviews before sending	Coach	Productivity	P4 beta, P5 GA
COA-26	Branded (white-label) app	Large coaches	Premium add-on	P5

4.3 Module C — Trainee / athlete (TRN)

ID	Feature	Roles	Value	Phase
TRN-01	Onboarding: goal, experience, equipment, days/week, optional assessment; works without any coach or gym	Trainee	B2C funnel	P1
TRN-02	"Today": workout, meals, habits, check-in due, class bookings	Trainee	Daily habit	P1
TRN-03	Workout logger: sets/reps/load/RPE, rest timer, previous performance, plate calculator, notes, swap exercise, **fully offline** with sync	Trainee	Core loop; gyms often have poor signal	P1
TRN-04	Own routines and free workouts	Trainee	Free tier value	P1
TRN-05	Exercise demos (video, cues in Arabic)	Trainee	Safety, quality	P1
TRN-06	History, PRs, volume per muscle group, charts	Trainee	Motivation	P1 basic, P3 advanced (Plus)
TRN-07	Body metrics, measurements, weight trend, private progress photos (encrypted, never shared without a grant)	Trainee	Progress	P1
TRN-08	Food diary: Arabic search, local foods, custom foods/meals, macros, water	Trainee	Nutrition loop	P1 view coach plan; P2 diary
TRN-09	Habits and reminders (steps, water, sleep, supplements)	Trainee	Adherence	P2
TRN-10	Chat with coach; Progress Check-in submission	Client	Coaching loop	P1
TRN-11	Gym membership card (QR), visit history, freeze/transfer requests, invoices	Member	Gym member app	P2
TRN-12	Class schedule, booking, waitlist, cancellation	Member	Gym loyalty	P2
TRN-13	PT session booking and confirmation	Member	PT revenue	P2
TRN-14	"My memberships": every gym/coach relationship and what each can see	Trainee	Trust	P2
TRN-15	Discover coaches/gyms/classes; compare packages	Visitor	Marketplace demand	P3
TRN-16	Purchase packages/memberships (web checkout; in-app only where store rules allow, §8.5)	Trainee	GMV	P3
TRN-17	Wearables: Apple Health, Android Health Connect (steps, workouts, weight, resting HR, sleep)	Trainee	Data richness	P3
TRN-18	Trainee Plus: advanced analytics, unlimited routines/history exports, smart progression, full food diary features	Trainee	B2C revenue	P3
TRN-19	Recovery/readiness (sleep, soreness, HRV if available)	Trainee	Better coaching	P3
TRN-20	Challenges, streaks, badges, leaderboards (opt-in, per Org or public)	Trainee	Engagement	P4

ID	Feature	Roles	Value	Phase
TRN-21	AI weekly summary and suggestions (wellness framing)	Trainee	Plus value	P5

4.4 Module A — Gym and fitness centre (GYM)

ID	Feature	Roles	Value	Phase
GYM-01	Gym onboarding: profile, branding, branches, hours, capacity, facilities, tax settings, import members (Excel)	Owner	Activation	P2
GYM-02	Staff, roles, permissions, branch scoping, manager PIN approvals for sensitive actions	Owner	Control	P2
GYM-03	Membership plans: duration, price, joining fee, branch access (single/multi), time windows (off-peak), included classes/PT/guest passes, family/couple plans	Owner	Revenue design	P2
GYM-04	Member registration at the desk (≤ 60 s): phone, name, photo, emergency contact, digital waiver/contract signature, guardian for minors	Receptionist	Throughput	P2
GYM-05	Contract lifecycle: renew, freeze (min/max days, fee, allowed count), cancel (notice period, refund rule), transfer (person/branch), upgrade/downgrade with proration	Manager	Correctness, less arguing	P2
GYM-06	Front desk: QR check-in/out, manual lookup, entry rules (expired/frozen/debt/time window), live occupancy	Receptionist	Speed, leakage control	P2
GYM-07	Access hardware: turnstile/door relay, QR readers, (later) face/fingerprint devices	Owner	Leakage control	P4
GYM-08	Classes: recurring schedule, rooms, instructors, capacity, booking windows, waitlist auto-promotion, late cancel/no-show penalties	Manager, member	Utilisation	P2
GYM-09	PT management: PT packages, trainer availability, booking, session confirmation by member, expiry rules	Trainer, member	PT revenue	P2
GYM-10	Freelance trainer agreements: monthly floor fee, per-session fee or revenue share; who owns the client relationship	Owner, freelance trainer	The wedge (§10)	P2
GYM-11	Staff shifts, attendance, leave	Manager	Ops	P3
GYM-12	Trainer compensation engine: salary + commission rules, statements, payroll export (Excel)	Owner, trainer	Trust, time	P2 commissions, P3 payroll export
GYM-13	POS: products, services, memberships, cash drawer per shift, receipts (80 mm), refunds with approval	Receptionist	Retail revenue	P2
GYM-14	Inventory per branch: stock, receiving, counts; transfers between branches	Manager	Supplements/merch	P2 basic, P3 transfers
GYM-15	Online renewals/purchases through the gym's Connected Gateway; online shop	Member	Convenience	P3 (renewals), P4 (shop)
GYM-16	Discounts, promotions, coupons, corporate rates	Manager	Sales	P2 basic, P3
GYM-17	CRM: inquiries, guest/trial passes, follow-up tasks, conversion	Sales	Growth	P2
GYM-18	Retention: renewal reminders (WhatsApp), at-risk members (visit drop), win-back campaigns	Manager	Churn ↓	P2 reminders, P3 risk list
GYM-19	Referral and loyalty (points for visits/referrals, rewards)	Member	Growth	P4

ID	Feature	Roles	Value	Phase
GYM-20	Equipment and facility: assets, maintenance tickets, cleaning checklists	Manager	Ops	P3
GYM-21	Reports: revenue, renewals, churn, attendance heat-map, class utilisation, trainer productivity, payment reconciliation, Excel export	Owner	Decisions	P2 core, P3 advanced
GYM-22	Public gym page, class timetable widget, custom domain	Owner	Acquisition	P3
GYM-23	Chain console: cross-branch access, consolidated reports, branch comparison	Chain ops	Chains	P3
GYM-24	Member app (the same Qowa app, gym features unlocked by membership)	Member	Retention	P2
GYM-25	Member requests and complaints (freeze, transfer, cancellation) with SLA	Member, manager	Service	P3
GYM-26	ETA e-receipts (Egypt) / ZATCA invoices (KSA) for the gym's own sales	Owner	Compliance	P4 (or via partner)
GYM-27	Franchise management (royalties, brand standards)	Franchisor	Enterprise	P5

4.5 Marketplace (MKT)

ID	Feature	Roles	Value	Phase
MKT-01	Coach directory and search (specialty, language, gender, price, online/in person, area, rating)	Visitor	Demand	P3 (public pages indexed from P1)
MKT-02	Gym, studio and class discovery with map and filters	Visitor	Demand	P3
MKT-03	Listings: coaching packages, PT packs, class packs, drop-ins, memberships	Coach, gym	GMV	P3
MKT-04	Verified reviews (only after a paid, delivered engagement); moderation	Client	Trust	P3
MKT-05	Verification: identity + certificates; badge	Coach	Trust	P3
MKT-06	Platform Checkout, commission, payouts, statements	All	Revenue	P3
MKT-07	Refunds, disputes, cancellation policies	Client, platform	Trust	P3
MKT-08	Featured placement (paid)	Coach, gym	Revenue	P5
MKT-09	Freelance trainer ↔ gym matching (trainers find gyms to work from)	Trainer, gym	Supply liquidity	P4
MKT-10	Corporate wellness (employers buy access for staff)	Employer	B2B2C	P5

4.6 Traceability rule

Every feature above maps to: a role (column "Roles"), a value (column "Value") and a phase. The technical document maps each feature ID to a module (Technical §2.1, §7.1) and the phases to milestones (Technical §21). A feature with no paying persona and no retention effect does not enter the backlog.

5. Module and role-level capability matrix

5.1 Roles

Code	Role	Where they work	Notes
PA	Platform admin / support	Admin console	Never sees client health data unless the Org grants support access (audited)
GO	Gym owner	Web (desktop), mobile web	Owner of a gym Org; all permissions of the modules the Org pays for
BM	Branch manager	Web	Scoped to assigned branches
RC	Receptionist	Web on tablet (installable PWA)	Scoped to one branch; no exports, no price edits by default
IT	In-house trainer	Mobile app (coach mode) + web	Sees only assigned clients
FT	Freelance trainer at a gym	Mobile app; their own coaching business + limited gym access	Gym-side access limited to the gym clients they serve under the agreement
IC	Independent coach (owner of a coaching business)	Mobile app + web	Owner of a coaching Org
TC	Team coach (staff of a coaching business)	Mobile app + web	Sees only assigned clients
TR	Trainee / member / client	Mobile app (trainee mode), web	Owner of their Personal Space
MV	Marketplace visitor	Public web	Anonymous

5.2 Capability matrix

Legend: ● full · ◐ scoped (own branch / assigned clients / own records) · ○ view only · — none.

Capability	PA	GO	BM	RC	IT	FT	IC	TC	TR	MV
Manage Org profile, branding, branches	○	●	◐	—	—	—	●	—	—	—
Manage staff and roles	○	●	◐	—	—	—	●	—	—	—

Publish public profile / listings	moderate	●	—	—	◐ own bio	●	●	◐ own bio	—	view
Leave reviews	moderate	reply	reply	—	—	reply	reply	reply	● (verified)	read

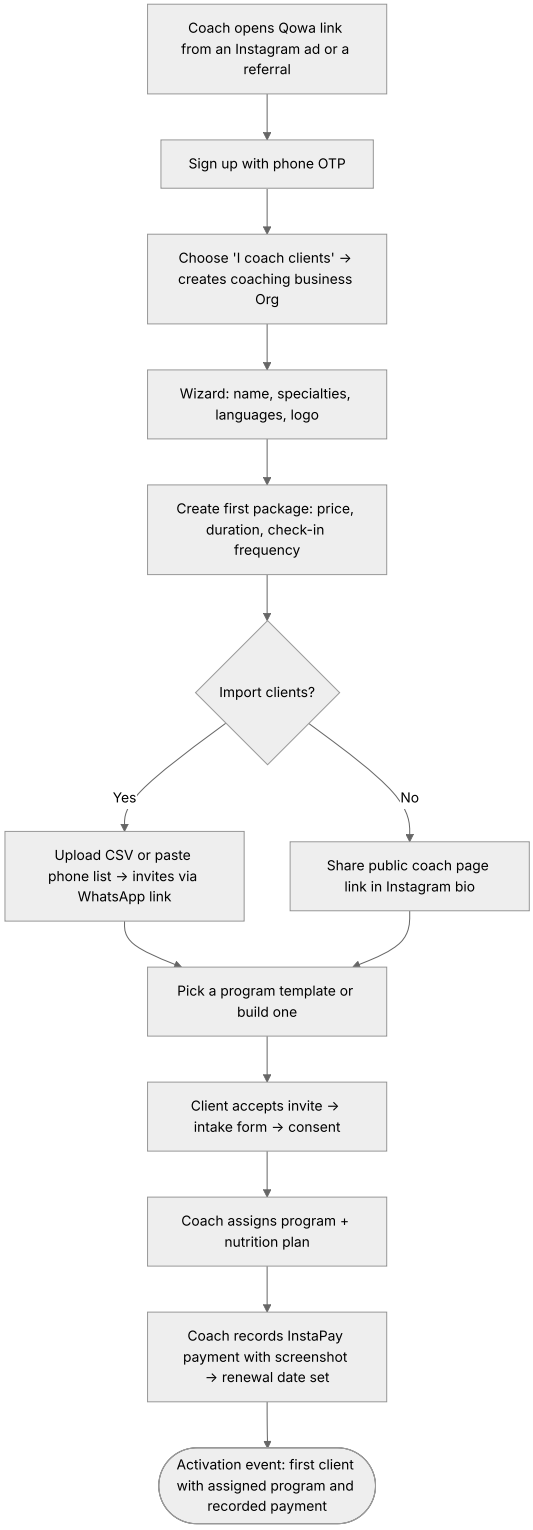

Notes: [1] only if the owner allows price edits per role. [2] their own coaching business only. [3] freeze within plan rules; cancellation needs a manager PIN. [4] **gyms do not see training/health data by default**: only attendance, bookings and contract data; health data needs a Data Access Grant (e.g. a member who buys PT grants the PT trainer access). [5] only clients assigned to them, only the scopes granted. [6] receptionist chat is limited to the gym's "front desk" inbox, not 1:1 coaching threads.

5.3 Module by persona

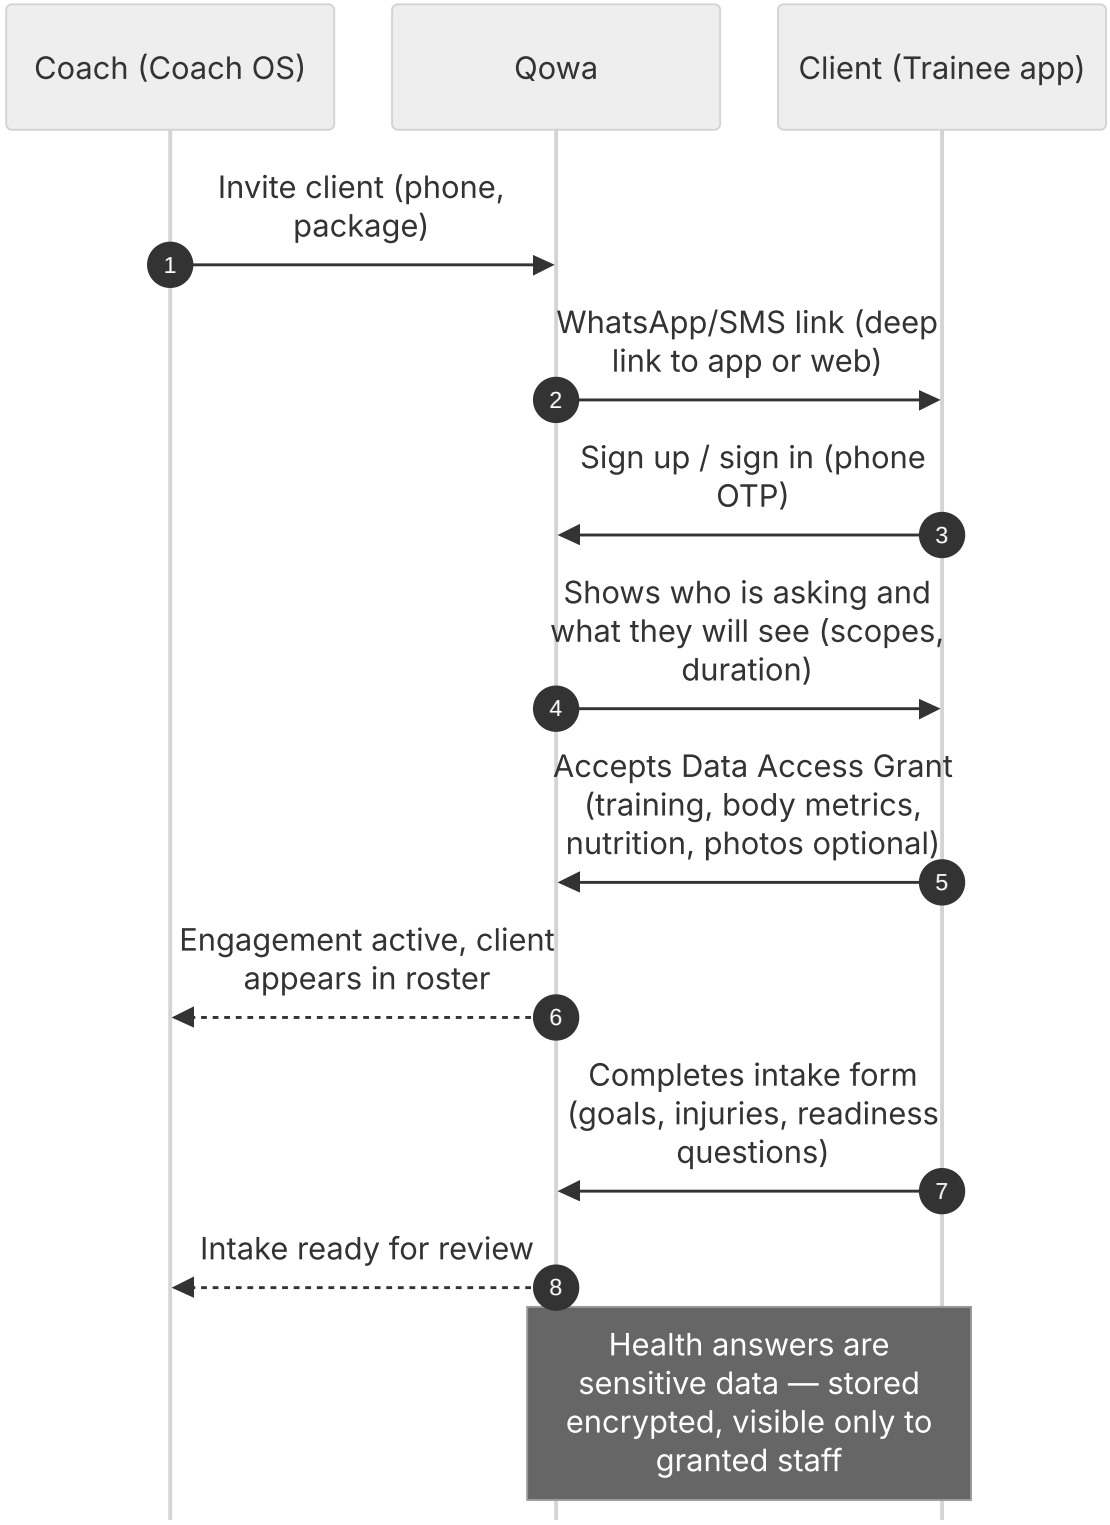

Module	Primary buyers	Primary users	Revenue role
A — Gym OS	P-01, P-02	P-03, P-04, P-05, P-09	Highest ARPA, lowest churn
B — Coach OS	P-06, P-07, P-08	Same + their clients	Volume, supply for marketplace
C — Trainee app	P-10 (Plus), sponsored by A/B	P-09, P-10, P-11	Funnel, retention, demand
Marketplace	Coaches, gyms (commission)	P-12	Commission, growth loop

6. User journeys and operational workflows

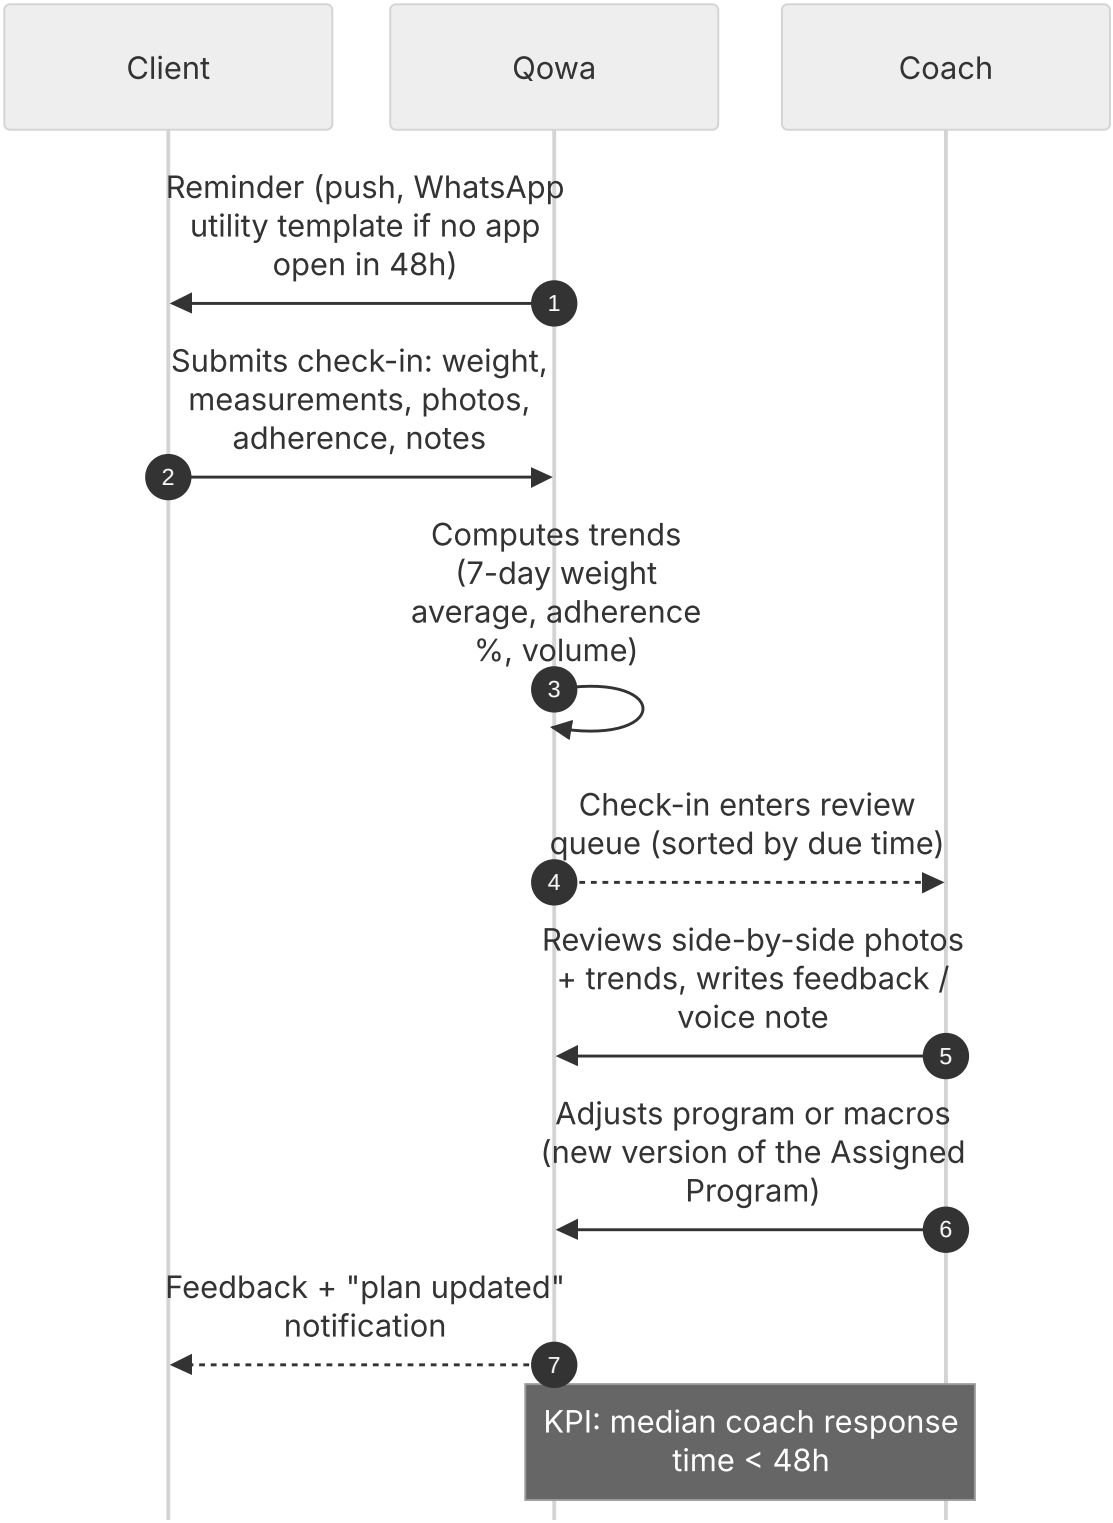

6.1 Coach: sign-up to first paying client (target ≤ 30 minutes)

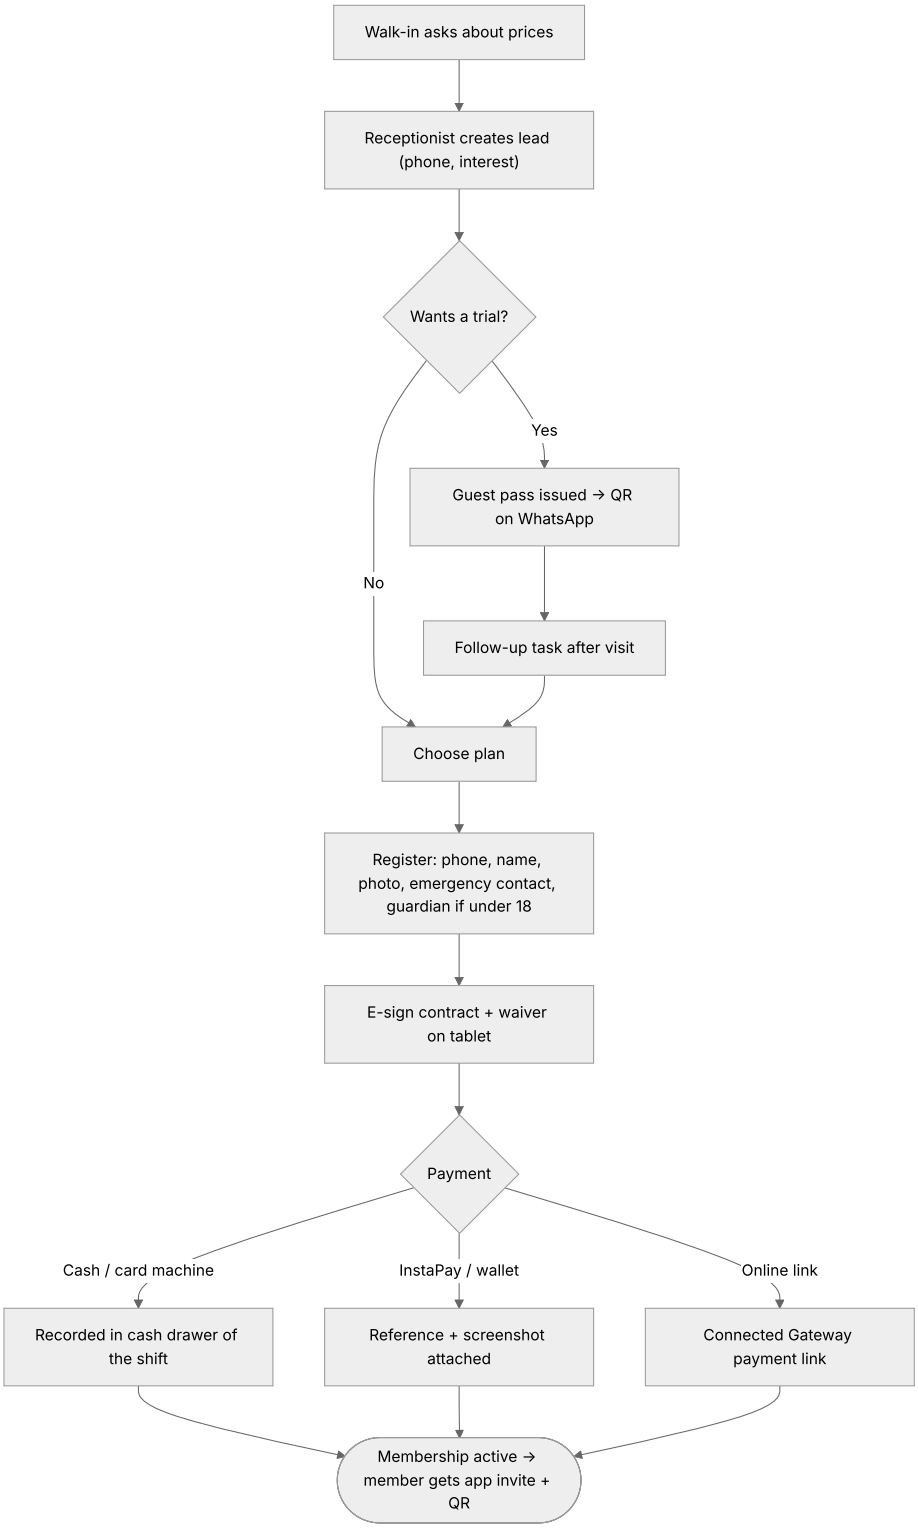

6.2 Client invite, intake and consent

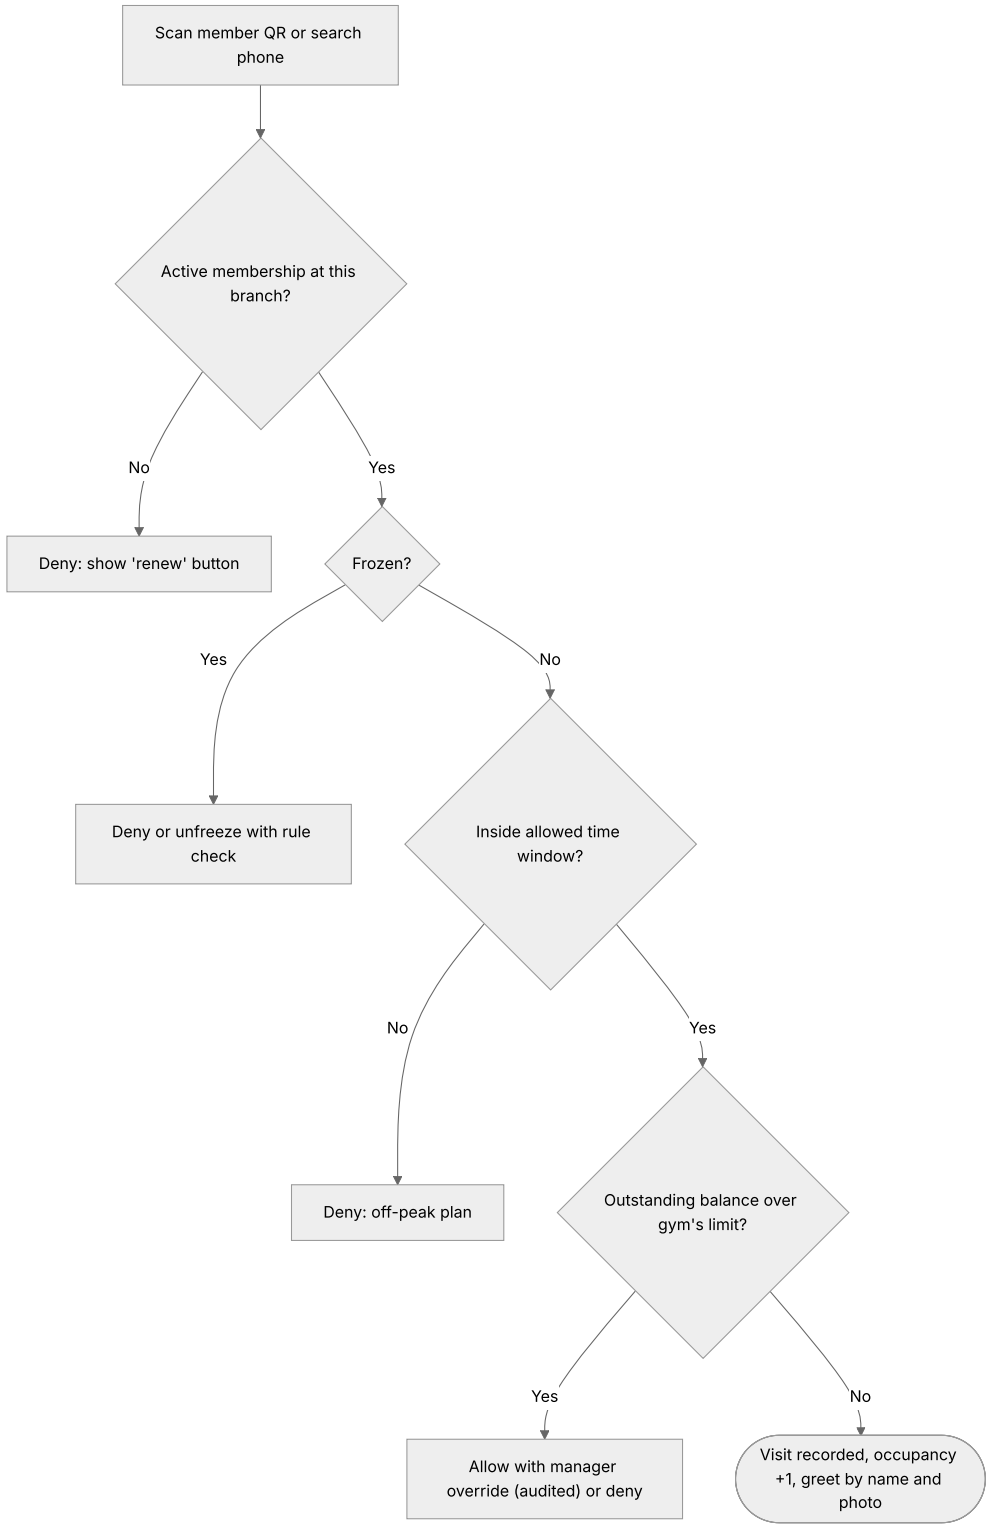

6.3 Weekly Progress Check-in loop

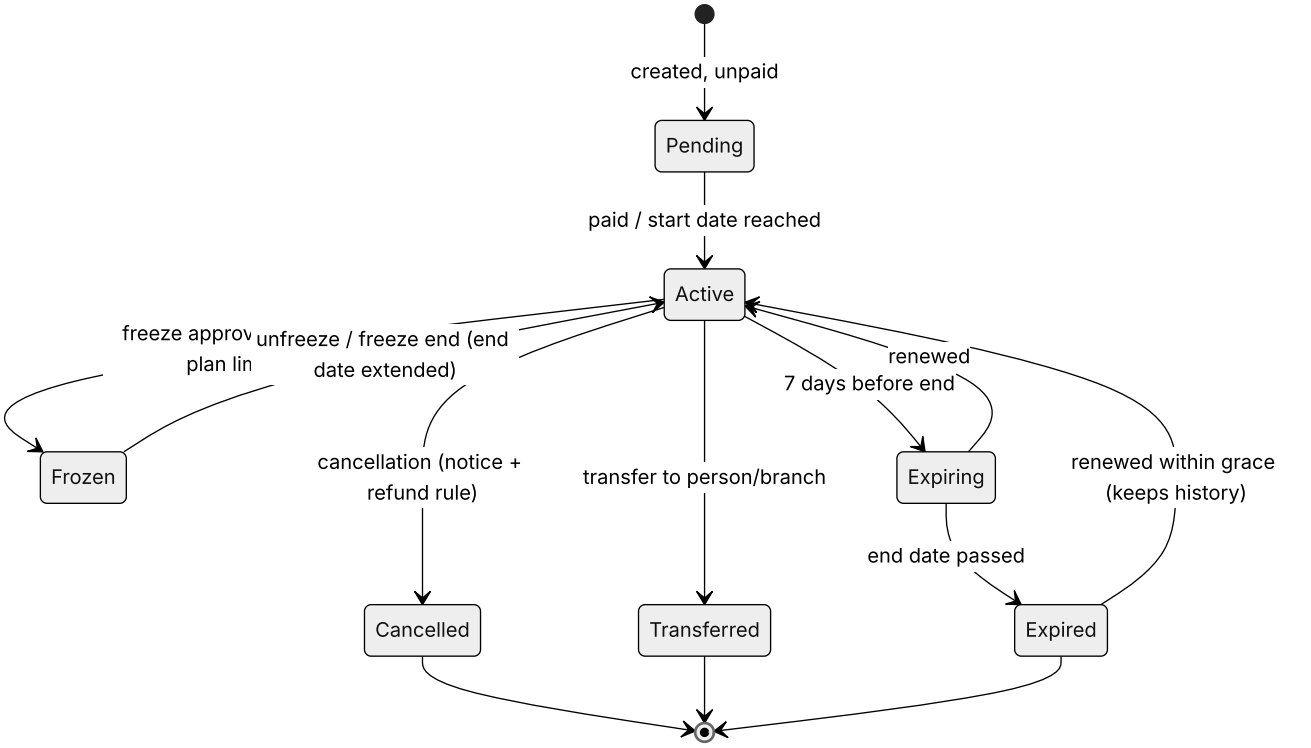

6.4 Gym: walk-in to active member (target ≤ 3 minutes at the desk)

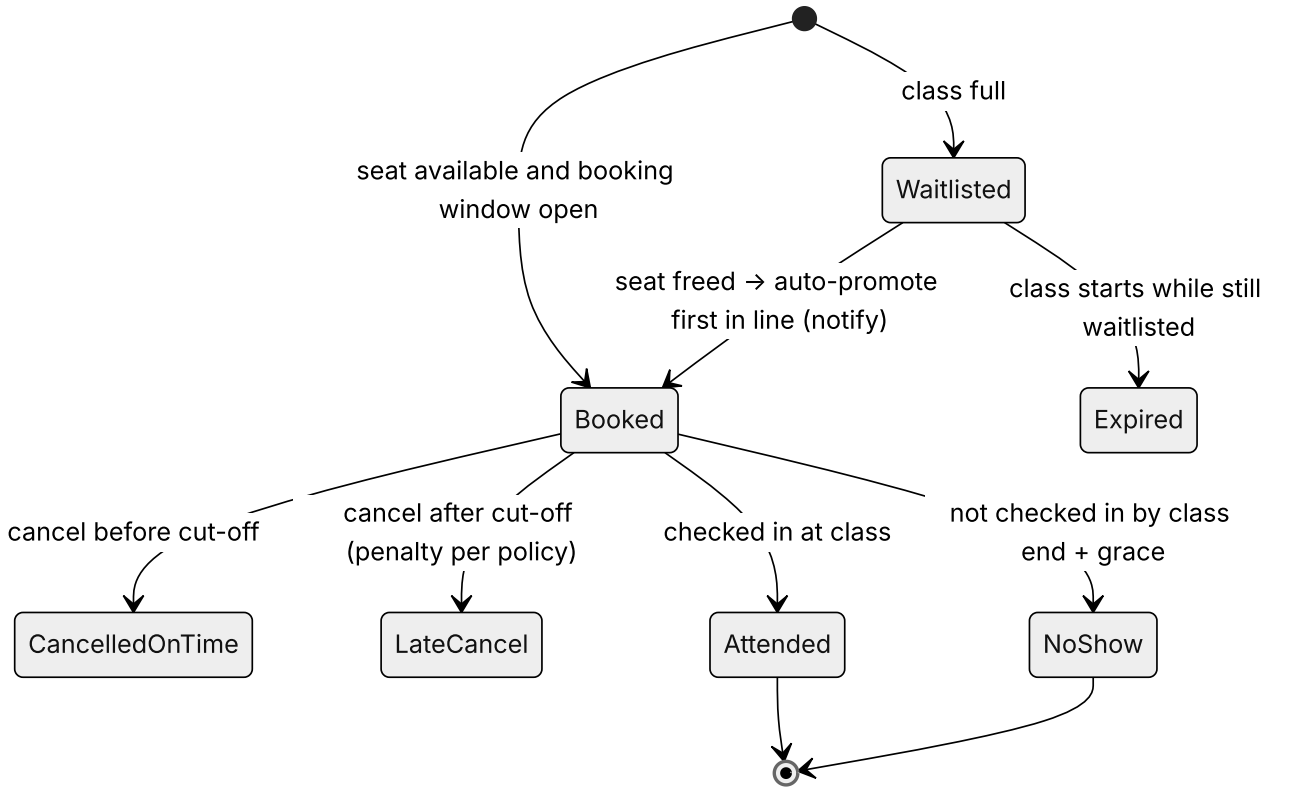

6.5 Front-desk entry decision

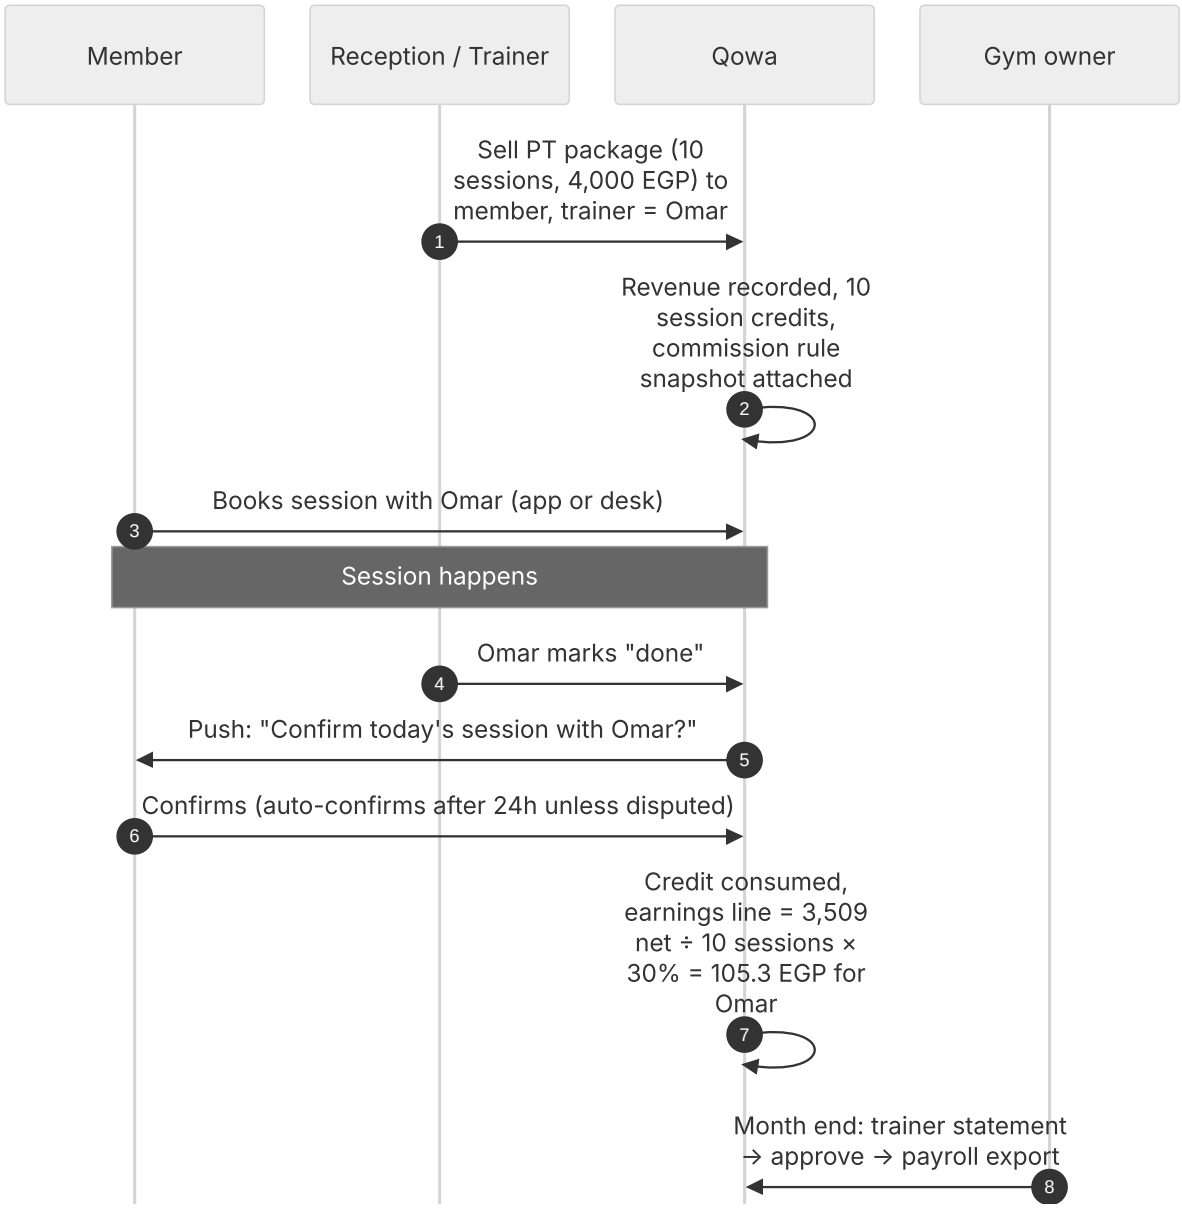

6.6 Gym Membership contract states

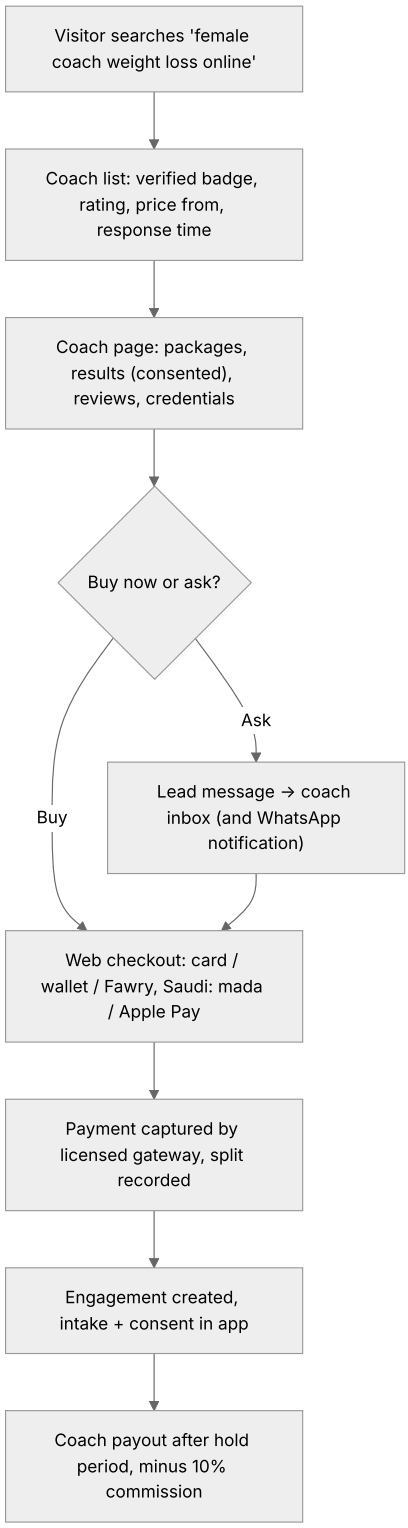

6.7 Class booking with waitlist

6.8 PT session and trainer commission

6.9 Marketplace: discovery to purchase (Phase 3)

6.10 When a trainee leaves a coach

Data	What happens	Why
Workout logs, body metrics, check-in answers, photos, food diary	**Stay in the trainee's Personal Space.** The coach loses access when the grant ends (end of engagement + 7-day wind-down, configurable 0–30 days).	Trainee owns their data (Law 151 rights; trust)

Data	What happens	Why
Assigned Programs and meal plans received during the paid period	Trainee keeps a **read-only copy** with attribution ("by Coach Nour"). They can keep logging against it.	They paid for it; coach keeps the template
Program Templates, exercise videos, coach notes	**Stay with the coach's Org.** Private coach notes are never shown to the trainee.	Coach's IP
Chat history	Both sides keep the history; it becomes read-only. Either party may request deletion of their own messages subject to retention (§18).	Record of advice given
Payments, invoices	Stay with the coach's Org (business records, tax retention).	Legal retention
Coach-only aggregated stats	Coach keeps anonymised aggregates (e.g. "retention 6 months"), not identifiable data.	Analytics

A coach can choose a stricter policy ("programs are view-only during the engagement"), which must be shown to the client **before** purchase.

6.11 When a trainer leaves a gym

Situation	Client relationship owner	Effect
In-house trainer leaves	**Gym**	Trainer's access to gym clients ends immediately; clients are reassigned; remaining PT credits stay with the gym.
Freelance trainer, clients acquired **through the gym** (agreement type "gym-sourced")	Gym	Same as above; the agreement may include a non-solicitation clause — Qowa enforces data access, not the law.
Freelance trainer, **own clients** training at the gym (agreement type "trainer-sourced")	**Trainer's coaching business**	Clients stay with the trainer; the gym keeps only attendance/floor-fee records.
Client of either kind independently follows the trainer	Client decides	A client can start a new engagement with the trainer's own business; a new grant is required. The gym is not notified of the content, only that the gym engagement ended.

This classification is set **when the client is added** (default chosen by the gym's agreement with the trainer) and is visible to all three parties. It prevents the most common conflict between gyms and freelance trainers (§9.6).

6.12 Platform subscription lifecycle (business view)

Stage	Rule	Detail
Trial	14 days full plan, no card for coaches; 14 days for gyms with onboarding call	Technical §11
Active	Paid period (monthly or yearly); auto-renew with saved card if chosen, otherwise invoice + reminder	Reminders at −7, −3, −1, 0 days
Past due	7 days full access, banner	Card retries on days 1, 3, 6
Restricted	Days 8–21: read-only for business data; **clients keep logging** in their Personal Space; no new clients	Never punish trainees for their coach's unpaid bill
Suspended	Day 22+: Org data hidden from staff (kept 90 days), clients' grants paused	Export available to owner
Closed	After 90 days suspended: Org data deleted per retention; trainees' Personal Spaces untouched	Notice e-mails at 60/30/7 days

7. SaaS plans, packages and feature entitlements

7.1 Plan catalogue (Egypt; VAT-inclusive list prices)

Subject	Plan	Monthly (EGP)	Yearly (EGP, 2 months free)	Limits	Key entitlements
Person	**Free**	0	—	Unlimited logging; 3 own routines; 12 months of charts; 2 GB photo storage	Logger, coach plans view, chat with coaches, check-ins, gym member features when sponsored
Person	**Trainee Plus**	79	599 (≈ 37% off)	Unlimited routines, full history analytics	Advanced analytics, smart progression, full food diary features (barcode, recipes), wearable sync, CSV export
Coaching business	**Coach Free**	0	—	3 active clients, 1 coach	Programs, check-ins, chat, public page (with "Qowa" branding)
Coaching business	**Coach Starter**	349	3,490	15 active clients, 1 coach	+ nutrition plans, payment tracking, packages, intake forms
Coaching business	**Coach Pro**	799	7,990	50 active clients, 1 coach; +10 EGP per extra active client	+ automations, lead pipeline, scheduling, business dashboard, Connected Gateway, custom page colours/logo
Coaching business	**Coach Team**	1,999	19,990	3 coaches, 150 active clients; +399/extra coach	+ client assignment, shared templates, coach quality metrics, roles
Gym	**Gym Essentials**	900 / branch	9,000	≤ 250 active members per branch	Members, contracts, freezes, front-desk QR, basic classes, renewals reminders, basic reports, member app
Gym	**Gym Growth**	1,900 / branch	19,000	≤ 800 active members per branch	+ PT packages, trainer commissions, freelance agreements, POS + stock, CRM/trials, waitlists, advanced reports
Gym	**Gym Pro**	3,500 / branch	35,000	Unlimited members	+ multi-branch access & chain console, staff shifts, equipment, API (P5), priority support

Add-ons (any business plan): WhatsApp automation pack (pass-through + 20%), extra storage (video), Connected Gateway setup help (one-off), data migration (one-off 1,500–5,000 EGP), white-label app (P5, quoted), access-control integration (P4, per device).

Active client / active member = a client with an active engagement or a member with an active/frozen contract at any time in the billing month. Archived clients are free (keeps coaches honest without punishing them for history).

7.2 Saudi plans (VAT-exclusive, B2B)

Plan	Monthly (SAR)	Notes
Coach Starter / Pro / Team	49 / 119 / 299	Same limits as Egypt
Gym Essentials / Growth / Pro (per branch)	299 / 549 / 899	ZATCA invoices, mada, Apple Pay
Trainee Plus	19.99 / month, 149 / year	Store pricing tiers

7.3 Entitlement keys (shared with Technical §11)

Key	Free	Plus	Coach Free	Starter	Pro	Team	Essentials	Growth	Gym Pro
`coach.active_clients`	—	—	3	15	50 (+metered)	150	—	—	—
`coach.seats`	—	—	1	1	1	3 (+metered)	—	—	—
`coach.nutrition_plans`	—	—	✓	✓	✓	✓	—	—	—
`coach.automations`	—	—	—	—	✓	✓	—	—	—
`org.connected_gateway`	—	—	—	—	✓	✓	—	✓	✓
`gym.active_members_per_branch`	—	—	—	—	—	—	250	800	∞
`gym.pt_and_commissions`	—	—	—	—	—	—	—	✓	✓
`gym.pos_inventory`	—	—	—	—	—	—	—	✓	✓
`gym.multi_branch_access`	—	—	—	—	—	—	—	—	✓
`trainee.advanced_analytics`	—	✓	sponsored*	sponsored*	sponsored*	sponsored*	—	—	—
`trainee.wearables`	—	✓	—	—	sponsored*	sponsored*	—	—	sponsored*
`trainee.member_app`	—	—	—	—	—	—	sponsored	sponsored	sponsored

*sponsored = the Org's clients receive this entitlement while their engagement is active (§7.4).

7.4 What a trainee gets, and what happens when it ends

Source	Features	When it ends
Free (own)	Logger, routines (3), body metrics, photos, chat, check-ins, basic charts, viewing any plan received	Never
Plus (own)	Analytics, unlimited routines, wearables, full food diary, exports	At period end → back to Free; all data kept; extra routines become read-only beyond 3 (not deleted)
Coach-sponsored	Everything the coach's plan gives clients (e.g. advanced analytics on Pro)	Grace 7 days, then back to own entitlements; delivered plans stay read-only (§6.10)
Gym-sponsored	Member card, bookings, gym classes, gym challenges	Gym features hidden when the membership ends; visit history kept in the Personal Space
Multiple sources	**Union** of all active entitlements	Each source expires independently

Rule: **losing an entitlement never deletes trainee data**. It only limits creation of new premium objects.

8. Subscription and revenue strategy

8.1 Which revenue models, and when

Model	Use?	When	Reason
Gym subscription per branch, tiered by active members	**Yes**	P2	Matches how gyms think (per location, by size); predictable
Coach subscription tiered by active clients	**Yes**	P1	Grows with the coach's success; free tier feeds the funnel
Per-seat (coach teams)	**Yes**	P2	Agencies scale by coaches
Pure per-active-member pricing for gyms	No (only as tier limits)	—	Gyms in Egypt dislike variable bills; tiers + soft limits are easier to sell
Trainee subscription (Plus)	**Yes, small**	P3	Funnel and retention; low Egyptian WTP
Annual plans (2 months free)	**Yes**	P1	Cash up-front, lower churn
One-off setup / migration fees	**Yes**	P2	Pays for onboarding effort for gyms
Usage-based pass-through (WhatsApp, SMS, video minutes, extra storage)	**Yes**	P1–P4	Protects margin on variable costs
Marketplace commission	**Yes**	P3	Revenue from demand we create
Payment processing margin (PushPress-style "free software, paid processing")	**Defer**	≥ P4	Needs payment licensing/partner economics; Egyptian margins on cards are thin
White-label / custom-branded app	**Defer**	P5	High support cost; ask ≥ 10 qualified requests first
Featured listings / advertising	**Defer**	P5	Only after marketplace traffic exists; risks trust
Selling or sharing data	**Never**	—	Sensitive health/financial data; trust and law

8.2 Billing policies (business rules)

Policy	Rule
Trials	Coaches: 14 days of Pro, no card. Gyms: 14 days of Growth with a guided onboarding call. One trial per business (phone + tax ID + device signals).
Upgrades	Immediate; charged pro-rata by day for the rest of the period.
Downgrades	At period end. If usage exceeds the lower limit, the downgrade waits until the coach archives clients (no data deleted).
Over limit	Soft limit: warn at 80%, allow +10% for 14 days, then require an upgrade to **add** clients/members. Existing clients are never blocked.
Cancellation	At period end; no refunds for monthly. Yearly: pro-rata refund within 30 days of purchase, otherwise none (consumer-law check **[VERIFY]**).
Failed payment	Dunning per §6.12 (past due → restricted → suspended); retries for saved cards on days 1, 3, 6; WhatsApp + e-mail + in-app reminders with a one-tap pay link.
Prepaid default	Most Egyptian customers pay by InstaPay/wallet → invoices with "paid until" dates, not card-on-file. Auto-renew is offered when a card is saved.
Discounts	Coupons (percent for N months, fixed amount, credit), annual discount, referral credit (one free month for both coaches when the referred one pays). Max one percentage coupon at a time.
Founders offer	First 200 coaches and first 30 gyms: 40% off for 12 months in exchange for feedback calls and a case study.
Currency	EGP in Egypt (VAT-inclusive), SAR in KSA (VAT-exclusive B2B). No USD pricing for local customers.
Price reviews	Every 6 months against inflation/FX; existing customers keep their price for 12 months after any rise (grandfathering builds trust after devaluations).

8.3 Payment methods for platform billing

Market	Methods	Provider (recommendation)	Notes
Egypt	Cards (incl. Meeza), Apple Pay, mobile wallets, Fawry reference, **InstaPay transfer + proof**	**Paymob** primary (2.75% + EGP 3 standard [S23]); Kashier as second quote (2.85% + EGP 3 reported, older source [S24])	InstaPay proofs approved by platform staff (auto-match on amount + reference later)
Saudi Arabia	mada, Visa/Mastercard, Apple Pay, STC Pay, bank transfer	**Moyasar** or **Tap** (both licensed; get quotes) [S26]	ZATCA-compliant invoices needed
App stores (Trainee Plus in-app)	Apple / Google billing	via RevenueCat (free < $2.5k monthly tracked revenue, then ~1%) [S35]	15–30% store fee **[VERIFY current programme terms]**

8.4 Who does what in billing

Concern	Payment provider	Qowa billing domain
Card data, 3-D Secure, tokenisation, PCI scope	✓	Never stores card numbers; hosted/iframe checkout only
Charging a saved card, refunds at network level	✓ (API)	Decides *when* and *how much*; idempotent requests
Plans, prices, coupons, trials, proration	—	✓
Entitlements (what a subject may use)	—	✓ (activated only after a confirmed payment event)
Invoices with VAT, numbering, e-invoice/e-receipt submission	—	✓ (ETA/ZATCA integration in P4 or via an accredited provider)
Dunning, reminders, grace periods	Card retries only	✓ (rules, messages, state)
Marketplace split, payouts to coaches	✓ (licensed marketplace/payout product)	Ledger of who is owed what, hold periods, statements
Reconciliation	Settlement reports	✓ daily matching of payments ↔ settlements ↔ ledger
Chargebacks	Notifies	Records, debits coach balance, evidence pack

8.5 App store rules that shape the product

What is sold	Where it can be paid	Rule (Apple App Review Guidelines; Google Play has similar rules)
Trainee Plus (digital feature subscription)	In-app via **IAP**, and on the web	Digital content/features consumed in the app require IAP when sold in the app (3.1.1) **[FACT, VERIFY current text]**
Gym memberships, in-person PT sessions, class packs	In-app with our gateway, or anywhere	Goods/services consumed outside the app may use other payment methods (3.1.5(a)) **[VERIFY]**
Real-time 1:1 online consults (video)	In-app with our gateway	Real-time person-to-person services may use other methods (3.1.3(d)); **one-to-few/one-to-many must use IAP** [S33]
Asynchronous online coaching packages (programs + chat + check-ins)	**Web only** (coach page, payment link, Platform Checkout on web)	Apple has treated non-real-time expert services as digital content requiring IAP [S33]. The iOS app is a companion for services bought elsewhere and must not link out to buy (outside regions where linking is allowed).
Coach and gym subscriptions (B2B)	Web only	Business tools used in the app, purchased on the web

[DECISION] The mobile app never sells coaching packages or business plans in Egypt/KSA. Marketplace checkout lives on the web. This keeps 15–30% store fees off the core revenue and avoids review rejections. It costs some conversion; the web checkout is optimised for mobile browsers to compensate.

8.6 Revenue recognition (for the accountant)

Platform subscriptions: recognised over the service period (yearly plans deferred monthly). Marketplace: Qowa's revenue is the **commission only** (agent model), not the gross order value — subject to the legal structure in §9.3 **[VERIFY with auditor]**. Setup fees: recognised when the service is delivered.

9. Marketplace and commission model

9.1 Thesis and cold start

The marketplace is a **phase-3 product built on supply we already have**, not a launch bet:

1. From P1, every coach gets an SEO-indexed public page (COA-02). Coaches share it on Instagram, which builds backlinks and brand at zero cost.
2. From P2, every gym gets a public page with its timetable (GYM-22 in P3; basic page in P2).
3. The searchable directory and checkout (P3) open per city only when **liquidity thresholds** are met:

Threshold (per city)	Value
Coaches with complete, verified public profiles	≥ 300 (Greater Cairo), ≥ 80 (Alexandria)
Coaches who answered ≥ 80% of leads within 24 h in the last 30 days	≥ 120
Specialties covered with ≥ 10 coaches each	weight loss, muscle gain, women's training, home workouts, nutrition
Gyms with live timetables	≥ 40

9.2 Take rates

Transaction	Commission	Who pays	Rationale
Coaching package bought by a client **who found the coach through the marketplace**	**10%** of net price, for the first 12 months of that client relationship	Deducted from coach payout	Pay only for demand we create; cheaper than Instagram ads per client
Coaching package bought by a client **the coach brought** (invite/own link) through Platform Checkout	**0% commission**; processing at cost (~2.75% + EGP 3)	Coach	Encourages moving payments onto the platform → better data, renewals
Gym membership bought via marketplace	5% of the first term	Gym	Gyms' margins are thinner; first term only
Class drop-in / class pack via marketplace	10%	Gym/studio	ClassPass-like demand
Products (P4 online store)	5%	Seller	Low-margin goods

On every Platform Checkout order, payment processing (~2.75% + EGP 3 in Egypt) is passed through to the seller as a separate statement line; commission is charged on the net price and carries VAT (14% in Egypt). Worked ledger example: Technical §11.8.

Disintermediation (client and coach going off-platform to skip the fee) is reduced by: low fee; commission only on originated clients; reviews only for purchases made on the platform; renewals, receipts and refunds protection only on-platform; and the coach's ranking rewarding on-platform renewals.

9.3 Who is the merchant of record?

Option	How	Pros	Cons	Verdict
A. Licensed gateway marketplace/split	Client pays through a licensed gateway's marketplace product; funds split between coach (sub-merchant or payout beneficiary) and Qowa commission. Paymob documents "MarketPlace by Paymob" and split features [S23]; Kashier offers payouts [S24].	Regulated party holds the funds; less licensing exposure	Depends on gateway product fit (individual coaches without a commercial register as beneficiaries)	**[RECOMMENDATION] Primary**, subject to legal opinion
B. Qowa collects and pays out	Qowa's merchant account collects; Qowa pays coaches	Simple UX, full control	Likely a regulated payment activity under CBE's June 2025 licensing rules [S31] **[VERIFY]**; capital/guarantee requirements	Avoid unless licensed
C. Lead generation only	Client pays coach directly (Connected Gateway / InstaPay); Qowa charges a fixed lead fee or listing fee	No money handling	Weak attribution, disintermediation	Fallback if A is blocked

Tax/legal [VERIFY]: VAT on commission (14% in Egypt); whether payouts to individuals trigger withholding obligations; consumer-protection obligations for distance sales; terms of service making Qowa an intermediary, not the coaching provider.

9.4 Payouts

Rule	Value
Hold period	7 days after purchase (14 days for a coach's first 3 sales) — covers early refunds/disputes
Schedule	Weekly (Sunday), minimum EGP 500 (else rolls over)
Methods	Bank account (IBAN), InstaPay address, mobile wallet — through the gateway's payout product
Statement	Per payout: orders, refunds, commission, processing, adjustments; downloadable PDF/Excel
Negative balance	From refunds/chargebacks after payout → netted from the next payouts; persistent negatives suspend selling

9.5 Refunds and disputes

- Each listing shows the seller's cancellation policy (choose from 3 standard policies: flexible, moderate, strict) before purchase.
- Platform default for unstarted packages: full refund within 48 h of purchase if no program was delivered.
- Disputes: client opens a case → seller has 72 h to respond → Qowa mediates with the evidence in the platform (delivered programs, chat, check-ins). Decision within 7 days.
- Egyptian consumer-protection rules for distance services must be reflected in terms **[VERIFY with counsel]**.

9.6 Conflicts between gyms, trainers, trainees and the marketplace

Conflict	Risk	Resolution in the product
A gym's freelance trainer lists themself on the marketplace and takes gym members off-book	Gym loses PT revenue; trust in Qowa drops	Client-ownership classification (§6.11) at enrolment; the gym sees PT sessions held **on its premises** (location-tagged bookings); marketplace listings for in-gym sessions show the gym and its floor rules
A gym wants to see what its members do with outside coaches	Privacy breach	Gyms never see another Org's data. Members can share selected data with the gym's trainers via a grant
A coach wants to see clients' full history from before the engagement	Over-collection	Grants have a "history window" (default: last 90 days + all future data during the engagement); the client can extend
Marketplace ranking favours gyms' own trainers or paying advertisers	Trust	Ranking rules published; "featured" placements labelled; no paid placement until P5
Reviews used as a weapon (competitors, ex-employees)	Unfair damage	Only verified purchasers review; seller reply; moderation and reporting
A trainee is a minor	Legal (children's data is sensitive)	Under 18 requires guardian consent; no marketplace purchases; no public reviews; photos off by default
Coach advises on medical conditions or extreme diets	Harm, liability	Wellness disclaimers, readiness questionnaire with "see a doctor" flags, prohibited-claims policy, reporting

9.7 Trust and safety

- Identity verification for sellers (national ID / iqama via manual review in P3; automated eKYC partner later).
- Certificates checked against issuer where possible; "Verified" means identity + at least one recognised certificate, explained on the badge.
- Before/after photos only with the client's explicit consent recorded per photo; faces blurrable.
- Content policy: no medical claims, no drug/steroid promotion, no body-shaming; enforcement ladder (warning → listing removal → ban).

9.8 Marketplace metrics

Lead-to-purchase conversion, median first-response time, GMV per active seller, repeat purchase rate, refund rate (< 3%), dispute rate (< 0.5%), share of renewals kept on platform (> 70%).

10. Gym and trainer business workflows

10.1 Trainer arrangements the system must support

Arrangement	Who sells to the client	Who collects money	Who owns the client relationship	How Qowa computes pay
Salaried	Gym	Gym	Gym	Fixed salary (exported to payroll), no per-session calc
Salary + PT commission	Gym (trainer sells)	Gym	Gym	% of PT package net revenue, earned per confirmed session
Commission only	Gym	Gym	Gym	% or fixed per session; optional monthly guarantee
Freelance — monthly floor rent	Trainer's own business	Trainer	Trainer	Gym charges the trainer a fixed monthly fee (invoice to trainer)
Freelance — per-session floor fee	Trainer's own business	Trainer	Trainer	Gym invoices trainer per confirmed session on premises
Freelance — revenue share	Gym or trainer	Gym (usually)	Agreed per client (gym-sourced vs trainer-sourced)	Split % of each package; settlement statement both ways
Class instructor per class	Gym	Gym	Gym	Fixed per class taught, bonus per attendee above threshold

10.2 Worked examples (numbers are illustrative **[ASSUMPTION]**)

Example 1 — in-house PT with commission. PT package: 10 sessions, 4,000 EGP incl. VAT → net 3,509 EGP. Commission rule: 30% of net, earned per confirmed session → 3,509 × 30% ÷ 10 = **105.3 EGP per session**. Trainer completes 8 sessions this month → 842 EGP commission. If the member gets a refund for the remaining 2 sessions, nothing is clawed back (unearned). If a session is disputed within 24 h, its earning waits.

Example 2 — freelance revenue share, gym-sourced client. Gym sells a 12-session package for 6,000 EGP (net 5,263). Agreement: 60% trainer / 40% gym on gym-sourced clients. Trainer earns 5,263 × 60% ÷ 12 = 263.2 EGP per confirmed session; the gym keeps 2,105 EGP. Statement at month end: gym owes the trainer for sessions confirmed.

Example 3 — freelance per-session floor fee. Trainer's own client pays the trainer 500 EGP/session (outside the gym's books). Gym charges 100 EGP per session held on premises. 20 sessions → gym invoices the trainer 2,000 EGP. Qowa counts sessions from location-tagged bookings confirmed by the client — the main way the gym prevents off-book sessions.

Example 4 — class instructor. 150 EGP per class + 10 EGP per attendee above 12. A class with 18 attendees → 150 + 6 × 10 = 210 EGP.

10.3 Commission rules (configuration)

- Rule types: percentage of net revenue (after discount, before VAT), fixed per session, fixed per class + per-attendee bonus, tiered by monthly volume (e.g. 25% up to 40 sessions, 30% above), renewal bonus (fixed when a client renews with the same trainer).
- **Earning moment**: at session confirmation (default) or at sale (for sales-only staff).
- Rule **snapshot**: the rule active at sale time is stored on the sale, so later rule edits don't change history.
- Clawback: only for refunds of sessions already paid out when the gym chooses "clawback on refund".

- Approval: month-end statement → manager review → owner approval → export (Excel/CSV) or record payout. Audited.

10.4 Membership operations rules (defaults gyms can change)

Rule	Default
Freeze	Max 2 freezes per contract, 7–30 days each, total ≤ 30 days per year; optional freeze fee; end date extended by freeze days
Transfer to another person	Allowed once, fee 10% of remaining value; manager approval
Branch transfer	Allowed for Pro chains; price difference charged/credited pro-rata
Upgrade	Pay the pro-rata difference; downgrade only at renewal
Cancellation	30 days' notice for contracts ≥ 6 months; refund of unused months minus a 15% fee (or no refund — gym's choice, shown on the contract)
Grace after expiry	3 days access with warning (configurable 0–7)
Minors	Guardian contact + consent mandatory; no marketing messages

10.5 Cash and reconciliation (gym)

Each receptionist works in a **shift** with a cash drawer: opening float, sales by method (cash, card machine, InstaPay, wallet, online), expenses/withdrawals with reason, closing count vs expected, difference flagged to the owner (large differences notify the owner immediately). Online and card-machine payments are reconciled daily against gateway/bank settlement files. These patterns are proven in retail POS systems and carry over directly.

10.6 Retention playbook built into the product

Signal	Automatic action
Contract ends in 7 days	WhatsApp reminder with renewal link; front-desk banner on next visit
No visit in 10 days (member who visited ≥ 2×/week)	Task for staff to call; optional "we miss you" message
Class no-show twice in a month	Message + booking restriction per policy
PT credits about to expire	Reminder to member and trainer
Coach client misses 2 check-ins	Coach alert; client nudge

10.7 The coach's weekly rhythm (what the product optimises)

Monday: review check-ins (queue sorted by due time) → adjust plans → send voice feedback. Daily: answer chat in batches (quick replies), approve new leads. Month end: renewals list → payment reminders → revenue summary. Target: **50% less admin time** than WhatsApp + Sheets (KPI in §17).

11. Pricing recommendations

11.1 Rationale

Principle	Application
Price under USD-priced rivals for the Egyptian long tail, compete on value for the top	Coach Starter 349 EGP (~$6.6) vs SuperCoach Essential $19 (~1,000 EGP) and Trainerize Pro-5 ~$23 [S1][S5]
Software cost ≤ 2–3% of the customer's revenue	A 35-client coach charging ~1,500 EGP earns ~52k EGP/month → Pro (799) = 1.5%. A 450-member gym at ~1,000 EGP/month = ~450k → Growth (1,900) ≈ 0.4%
Local gym tools anchor gyms low	GymFlow "from ~500 EGP" [S12]; our Essentials at 900 includes the member app; Growth at 1,900 sells the PT/commission wedge
Free tier for coaches, not for gyms	Coaches self-serve and spread the product; gyms need onboarding and support
B2C stays cheap	79 EGP/month ≈ a single protein bar's price difference; yearly 599

11.2 Price comparison (EGP/month at 52.5 EGP/USD)

Customer	Qowa	SuperCoach	Trainerize	Everfit	Local gym tools
Coach with 10 clients	349	~998 ($19)	~1,200+ (Pro tier for 15)	~1,000+	—
Coach with 40 clients	799	~2,360+ ($45+, rises)	~4,000–6,300	~3,000+ (+ add-ons)	—
Gym, 1 branch, 450 members	1,900 (Growth)	?	~13,000 (Studio Plus $248)	—	~500+ (GymFlow)

11.3 Tactics

- **Founders offer** (§8.2) to buy early references.
- Show **annual price per month** on the pricing page; default toggle to yearly for gyms.
- **Price localisation by market**, never by FX conversion on the fly.
- **Grandfathering** after increases (12 months).
- **Don't** discount below 30% outside the founders offer; give credits (extra months) instead of percentage cuts.
- Re-test price points at L6 and L12 with Van Westendorp surveys on active coaches and gym owners.

12. Financial forecasts and unit economics

All figures are **[ESTIMATE]** from an assumption-driven monthly model (inputs in Appendix B). They are planning scenarios, not predictions. Money is in EGP, **net of VAT** (Egyptian list prices include 14% VAT; Saudi B2B prices exclude VAT). Month L1 is the first month the Coach MVP is sold; the 6-month build before it costs ~1.52M EGP (~$28.9k) and is included in cumulative cash.

12.1 Key assumptions (summary)

Driver	Conservative	Base	Aggressive
New paying coaches in L1, monthly growth (L1–12 / L13–24)	8, +8% / +4%	15, +12% / +6%	25, +15% / +8%
Coach monthly churn	7%	5%	3.5%
Coach ARPA (list, incl. VAT)	600	650	700
New gyms from L7, monthly growth	2, +6%	4, +10%	6, +12%
Gym monthly churn	3.5%	2.5%	1.8%
Gym ARPA (list, incl. VAT)	2,100	2,400	2,700
Organic trainee MAU at L10, monthly growth	600, +10%	1,000, +15%	2,000, +18%
Plus conversion of organic MAU	2%	3%	4%
New marketplace engagements at L10, growth, monthly retention	15, +10%, 65%	30, +15%, 70%	50, +18%, 75%
KSA new coaches / gyms at L16, growth	4 / 1, +6%	8 / 2, +10%	12 / 3, +12%
CAC per coach / per gym (marketing only)	1,800 / 12,000	1,200 / 9,000	900 / 7,000

Shared: 18 active clients per paying coach; 400 members per gym, 35% use the app monthly; marketplace average order 1,800 EGP at 10% commission; KSA coach ARPA SAR 99, gym SAR 450, through a channel partner taking 20%; card share of platform billing 60% at 2.75% + EGP 3 (the rest InstaPay); WhatsApp utility messages at 0.30 EGP; AWS cost by MAU tier ($250 → $1,000 → $2,300 → $5,000; Technical §15).

12.2 Base scenario — quarterly snapshot

Month	Paying coaches (EG)	Gyms (EG)	KSA coaches / gyms	Plus subs	Active marketplace engagements	MAU	Net revenue / month	Gross margin	Opex / month	EBITDA / month	Cumulative cash
L3	48	0	—	—	—	1,135	27,547	48%	310,579	−297,284	−2.43M
L6	109	0	—	—	—	2,569	62,320	75%	344,722	−298,077	−3.30M
L9	189	13	—	—	—	6,254	135,031	56%	531,127	−455,870	−4.52M
L12	296	29	—	40	79	12,368	245,441	72%	563,592	−385,875	−5.75M
L15	422	50	—	60	146	18,916	372,894	79%	689,743	−393,604	−7.32M
L18	561	77	25 / 6	92	232	28,363	600,455	83%	762,927	−266,946	−8.27M
L21	719	112	55 / 15	140	356	40,242	879,841	76%	824,945	−152,429	−8.92M
L24	900	158	92 / 25	212	542	55,452	1,230,480	80%	905,115	+73,850	−8.94M

Gross margin dips when MAU crosses an AWS tier (L9, L21) and recovers as revenue grows into it.

12.3 Twelve- and twenty-four-month projections (all scenarios)

	Conservative	Base	Aggressive
Year 1 (L1–L12) revenue	0.45M	1.16M	2.39M
Year 1 cost of revenue	0.22M	0.38M	0.51M
Year 1 operating expenses	4.74M	5.01M	5.29M
Year 1 EBITDA	−4.51M	−4.23M	−3.41M
Net MRR at L12	89k (~$1.7k)	245k (~$4.7k)	531k (~$10.1k)
Paying coaches / gyms at L12	112 / 13	296 / 29	635 / 47
Year 2 (L13–L24) revenue	2.61M	8.22M	19.20M
Year 2 cost of revenue	0.91M	1.80M	3.32M
Year 2 operating expenses	8.08M	9.61M	11.37M
Year 2 EBITDA	−6.37M	−3.19M	+4.51M
Net MRR at L24	364k (~$6.9k)	1.23M (~$23.4k)	2.98M (~$56.8k)
ARR run-rate at L24	~$83k	~$281k	~$682k
Paying coaches / gyms at L24 (EG + KSA)	291 / 59	992 / 183	2,611 / 345
MAU at L24	17k	55k	129k
First month with positive EBITDA	not within 24 months	L24	L17
Peak cash need (incl. build)	> 12.4M (still burning)	9.0M (~$172k)	5.7M (~$109k)

L24 revenue mix (base): coaches 42%, gyms 27%, KSA 23%, marketplace 7%, Plus 1%.

12.4 Unit economics (base)

	Coach (Egypt)	Gym (Egypt)
ARPA, net of VAT	570 EGP	2,105 EGP
Variable cost per month (processing, WhatsApp, infrastructure share)	~50 EGP	~431 EGP
Contribution margin	~91%	~80%
Monthly churn → expected lifetime	5% → 20 months	2.5% → 40 months
Contribution LTV	~10,400 EGP	~67,000 EGP
CAC (marketing)	1,200 EGP	9,000 EGP
CAC incl. sales salary	1,200 EGP (self-serve)	~14,000 EGP (one rep closing ~5 gyms/month)
LTV / CAC	~8.7	~4.8 (fully loaded)
CAC payback	~2.3 months	~8.4 months (fully loaded)

Infrastructure cost per MAU at L24 base: $2,300 / 55k ≈ **$0.04 per MAU per month**. Payment processing on our own billing ≈ 1.8% of SaaS revenue (60% card share).

12.5 Break-even analysis

- **Operating break-even (base) ≈ L24**, when monthly net revenue (1.23M) covers cost of revenue (0.25M) and operating expenses (0.91M, of which ~0.37M is growth spend on CAC).

- **Steady-state break-even** (no growth spend): fixed costs at L24 are ~538k EGP/month (team, legal, tools, brand). They are covered by, for example, **600 coaches (~312k contribution) + 135 gyms (~226k contribution)**.
- **Lean team variant** (founder writes the backend; Flutter engineer, freelance designer and one support person until L10; backend hire at L10): **break-even L20, peak cash need ~4.7M EGP (~$90k)**, Year 2 EBITDA ≈ −0.07M. It ships the roadmap more slowly (Gym Core slips ~2 months) — the trade-off between runway and speed.

12.6 Sensitivity (base, one change at a time)

Change	L24 net MRR	Break-even	Peak cash need
Base	1.23M	L24	9.01M
Coach churn 7%	1.16M	L24	9.42M
Coach churn 3.5%	1.29M	L23	8.74M
Coach ARPA −20% (520)	1.13M	> L24	9.92M
Coach ARPA +20% (780)	1.33M	L22	8.22M
Coach CAC ×2 (2,400)	1.23M	> L24	10.62M
Gym churn 4%	1.20M	L24	9.14M
Gym ARPA 1,900	1.16M	L24	9.44M
No marketplace	1.14M	> L24	9.42M
No Saudi expansion	0.95M	> L24	9.27M
No gyms (coach-only)	0.90M	> L24	9.15M

Reading: the business is most sensitive to **coach CAC** and **coach ARPA**, then to the **Saudi** and **gym** expansions. A coach-only company does not break even in 24 months under base assumptions — which is why Gym OS is in the plan and why the gym wedge must be validated early (§13 gates).

12.7 Funding implications and stop/pivot triggers

Path	Cash to plan for	Fits
Bootstrap, lean team	~4.7M EGP (~$90k) + 20% buffer	Founder can write backend code and accept slower Gym Core
Small pre-seed, base team	~9.0M EGP (~$172k) + 20% buffer ≈ $205k	Faster roadmap, KSA from L16

Triggers reviewed at L6 and L12 (the "conservative" path is the warning case):

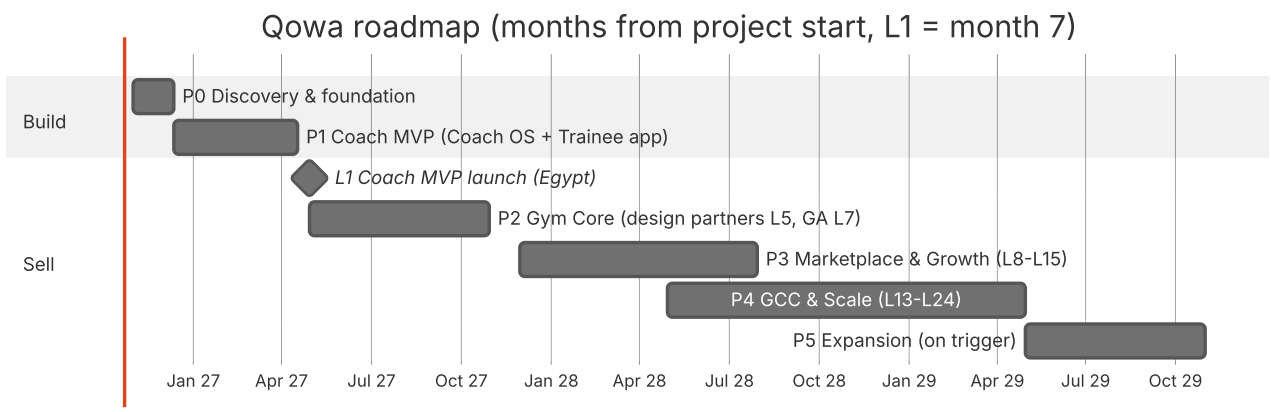

Checkpoint	Healthy	Act
L6	≥ 90 paying coaches, coach churn ≤ 6%, ≥ 40% of paying coaches' clients log weekly	< 50 paying coaches **or** churn > 8% → stop gym build, fix coach retention/positioning first
L12	≥ 250 coaches, ≥ 20 gyms, gym churn ≤ 3%	< 15 gyms → reconsider gym wedge (coach + studio focus); < 150 coaches → cut team to lean variant
L18	Marketplace ≥ 150 active engagements, KSA partner signed	Marketplace < 60 → keep as directory/lead-gen (Option C §9.3)

12.8 Operational overhead assumptions

Support: 1 customer-success person per ~300 paying coaches or ~60 gyms (Arabic, WhatsApp-first); onboarding call for every gym (60–90 min) and data import service; accounting + legal retainer 15k EGP/month; one-off legal ~250k EGP before launch (data protection licences, terms, payment structure) and ~300k EGP before KSA. Corporate income tax (22.5% in Egypt) is not modelled (losses carried forward).

13. MVP definition and product roadmap

13.1 Phases at a glance

Dates assume a November 2026 start; shift as needed. Detailed technical milestones, acceptance criteria and test plans: Technical §21 and Technical §22.

Phase	Business objective	In scope (feature IDs)	Explicitly out	Exit gate
P0 Discovery & foundation (6 weeks)	Validate pricing, wedge, legal path	30 coach + 15 gym interviews; SuperCoach/GymFlow demos; legal opinions (PDPL licences, marketplace money flow); design system; foundations (identity, tenancy, CI/CD)	Feature build	≥ 15 coaches pre-commit to the founders offer; legal path for hosting abroad confirmed or mitigation chosen
P1 Coach MVP (18 weeks → L1)	First revenue from coaches; trainees in the app	PLT-01–05, 07–10, 14; COA-01–07, 08 (assign), 09 (basic), 10–14, 19 (basic); TRN-01–07, 10	Gyms, marketplace checkout, scheduling, automations, wearables, AI, video, food diary, Plus	50 paying coaches by L3; check-in loop used weekly by ≥ 60% of active clients
P2 Gym Core (L2–L7)	Second revenue line with higher ARPA	GYM-01–06, 08, 09, 10, 12 (commissions), 13, 14 (basic), 16 (basic), 17, 18 (reminders), 21 (core), 24; COA-15, 17, 18, 20, 22; TRN-08, 09, 11–14; PLT-06, 11	Hardware access, payroll export, chain console, online shop	5 design-partner gyms live at L5; 20 paying gyms by L10; front-desk check-in < 3 s p95
P3 Marketplace & Growth (L8–L15)	Demand engine + B2C	MKT-01–07; COA-03 (badge), 16, 21; TRN-06 (advanced), 15–19; GYM-11, 14 (transfers), 15 (renewals), 20, 21 (advanced), 22, 23, 25	Ads/featured listings, white-label, AI	Liquidity thresholds (§9.1); marketplace refund rate < 3%
P4 GCC & Scale (L13–L24)	KSA revenue; enterprise readiness	KSA billing (Moyasar/Tap, SAR, ZATCA), PLT-12; GYM-07, 19, 26; COA-23, 24, 25 (beta); TRN-20; MKT-09; optional Saudi hosting cell	Franchise, public API	25 Saudi gyms + 90 Saudi coaches by L24 (base)
P5 Expansion (on trigger)	New revenue lines	COA-25 (GA), 26; TRN-21; GYM-27; MKT-08, 10; PLT-13	—	Per-initiative business case

13.2 The MVP: smallest commercially viable product

Who: independent online and hybrid coaches in Egypt with 5–60 clients, and their clients. **Promise:** *"Run your coaching business from one Arabic app: programs, nutrition, weekly check-ins, chat and payments — your clients get a real app instead of PDFs."*

Must have (P1)	Why it can't wait
Phone OTP sign-up, coach business creation, client invites via WhatsApp	Activation
Exercise library (~300, Arabic) + program builder + templates	Core value; switching cost
Basic nutrition plan (macro targets + meal plan with Egyptian foods + PDF)	Most Egyptian coaches sell training + nutrition
Trainee app: today view, offline workout logger, body metrics, photos	The client experience is what coaches sell
Progress Check-ins with review queue	The biggest time saver
1:1 chat with voice notes and images	Replaces WhatsApp for coaching
Packages + payment tracking (InstaPay/wallet/cash proofs) + renewal reminders	"Stop losing money"
Public coach page	Free acquisition; seeds the marketplace
Consent centre + data export on request	Legal requirement for sensitive data
Platform billing (Paymob + InstaPay proofs), trials, founders coupon	Revenue

Postponed until product–market fit (signals: L6 gate passed, NPS ≥ 40 among coaches): automations, lead pipeline, scheduling, team features (to P2); food diary for self-trainees, habits (P2); marketplace checkout, Plus, wearables, advanced analytics (P3); AI, video, digital products, white-label (P4–P5).

13.3 Release rhythm

Closed beta with 20 coaches (6 weeks before L1) → public launch with founders offer → two-week release train for web/API, weekly mobile builds through TestFlight / internal testing, store releases every 2–4 weeks with staged rollout (Technical §23).

13.4 When to add the "big" capabilities

Capability	Earliest	Trigger to start	Why not earlier
Wearables (Apple Health, Health Connect)	P3	≥ 30% of Plus-trial users ask for it, or a gym chain requires it	On-device integrations only (no server sync cost); Google Fit APIs end in 2026 and the Fitbit Web API changes in Sep 2026 [S52] — build on the new platforms only
Advanced analytics	P3	≥ 5k weekly active loggers	Needs data volume to be meaningful
Video consults (embedded)	P4	≥ 20% of coaches sell calls (via Meet/Zoom links today)	Per-minute costs; external links work meanwhile
Live/group streamed classes	P5	Corporate wellness or chain demand	Different infrastructure (Technical §10.7)
AI drafting (programs, meal plans, check-in summaries)	P4 beta	≥ 500 coaches, ≥ 50k logged workouts, safety policy approved	Needs our own data to be good and safe; must never replace coach approval
White-label app	P5	≥ 10 coaches/gyms willing to pay ≥ 2,500 EGP/month + setup	Store accounts, review overhead per brand
Public API	P5	First chain/enterprise deal requiring it	Versioning and support cost

14. Differentiation and positioning

Positioning statement. For Arabic-speaking coaches and gyms who run their business on WhatsApp and spreadsheets, Qowa is the operating system that runs programs, check-ins, memberships, PT and payments the way Egyptians and Saudis actually pay — and gives every trainee a training record they own. Unlike coach-only tools priced in dollars or gym tools that stop at the front desk, Qowa connects gyms, coaches and trainees in one ecosystem.

Pillar	Proof point in the product	Hard to copy because
Trainee-owned record	Personal Space, consent centre, portability when changing coach/gym	Data model and legal design from day one; incumbents' data belongs to the coach's account
Gym + coach + freelance trainer in one place	Freelance agreements, client-ownership classification, location-tagged sessions, commission engine	Needs both gym ops and coaching depth
Built for Egyptian/Saudi money	InstaPay proofs, wallets, Fawry, Apple Pay, mada; prepaid periods; Arabic invoices; ZATCA	Local payment and tax know-how
Arabic-first content	Exercise library with Arabic cues, curated Egyptian/Gulf food data	Content compounds over time
Fair prices in local currency	EGP/SAR pricing, free coach tier	USD-priced rivals carry cost structures that make this hard
WhatsApp-native	Invites, reminders, renewal links, click-to-chat	Workflow design, not a bolt-on

What we deliberately do not compete on (yet): hardware access control depth, US-style payments margin, AI "auto-coaching", global English markets.

15. Go-to-market

15.1 Coaches (P1 onwards, self-serve + community)

Channel	Tactic	Target metric
Instagram/TikTok ads (Arabic)	Short demos: "your check-ins in 2 hours not 8"; lead to free sign-up	CPA (paying) ≤ 1,200 EGP
Coach ambassadors	20 respected coaches get Pro free for a year + referral bonus; their public pages show "Powered by Qowa"	≥ 25% of new coaches via referral by L12
Certification academies and courses	Free Starter for graduates for 3 months; guest lessons on "running an online coaching business"	3 academy partnerships by L6
Content/SEO	Arabic guides ("how to price online coaching", "check-in templates") + coach pages	30% of sign-ups organic by L12
Migration service	We import their Sheets/PDF programs for Pro/Team annual buyers	Activation ≥ 70%

15.2 Gyms (P2 onwards, sales-assisted)

- **Design partners (L3–L5):** 5 gyms in Nasr City / Heliopolis / New Cairo / Sheikh Zayed, free for 6 months for weekly feedback.
- **Field sales:** 1 rep (L6), 2 reps (L13); district-by-district; demos on a tablet at the desk; data import included in yearly plans.
- **Partners:** equipment suppliers and gym consultants (10% recurring commission for 12 months, P4 partner program).
- **Proof:** case studies with numbers ("renewals up X%, PT revenue tracked 100%").

15.3 Trainees

Acquired mostly **through coaches and gyms** (B2B2C). Organic: Arabic SEO pages (exercise library, food pages, coach pages), app store optimisation in Arabic, referral rewards. No paid B2C acquisition before Plus conversion is ≥ 3%.

15.4 Saudi Arabia (P4)

Channel partner (gym consultancy or fitness distributor) on 20% revenue share; Arabic content already exists; Saudi references from Egyptian coaches with Saudi clients (a natural bridge: many Egyptian coaches already serve Gulf clients — validate in P0). Saudi gateway, SAR pricing, ZATCA invoices before the first sale.

15.5 Customer success

Onboarding checklist in-app (first program, first client, first check-in reviewed, first payment recorded); WhatsApp support line with < 2 h response in working hours; monthly "office hours" webinars; health score per account (logins, active clients, check-in response time) to spot churn risk.

16. Business risks and mitigations

#	Risk	Likelihood	Impact	Mitigation	Owner
R1	**Data protection licensing**: storing health/financial data abroad without a PDPC cross-border licence; sensitive-data processing licence delays	High	Critical	Legal opinion in P0; apply early; minimise sensitive data (photos optional, health questions optional); design for an Egypt-hosted fallback store (Technical §13.1, §25)	Founder + counsel
R2	SuperCoach (or another local player) cuts price or adds gym features	Medium	High	Move fast on the gym wedge and trainee ownership; local pricing; community	Founder
R3	Coaches churn after the novelty (low engagement of their clients)	Medium	High	Activation metrics, check-in loop quality, success team; L6 gate	Product
R4	Gym sales cycle longer than modelled	High	Medium	Design partners, data-import service, founders pricing; lean variant	Sales
R5	Marketplace fails to reach liquidity	Medium	Medium	Open per city only at thresholds; fall back to directory/lead-gen	Product
R6	Payment structure for marketplace judged a regulated activity	Medium	High	Use licensed gateway marketplace product (Option A); Option C fallback	Founder + counsel
R7	EGP devaluation erodes USD-denominated costs (AWS, tools)	Medium	Medium	Price reviews every 6 months; KSA revenue in a pegged currency; savings plans	Finance
R8	App store rejection (IAP rules)	Medium	Medium	§8.5 rules; no in-app purchase of coaching or B2B plans	Mobile lead
R9	Harm from training/nutrition advice (injury, eating disorders)	Low–Medium	High	Readiness questionnaire with referral flags, disclaimers, content policy, professional insurance for the company **[VERIFY availability]**	Product + legal
R10	Security breach of photos/health data	Low	Critical	Encryption, least privilege, private storage, audits, incident plan (Technical §16, Technical §20)	CTO
R11	Regional instability affecting cloud regions	Low (EU primary)	High	EU primary + cross-region backups; no Gulf primary in 2026 (§1.5)	CTO
R12	Key-person risk (solo founder)	High	High	Documentation, IaC, runbooks, two engineers who know each area	Founder
R13	Gym/trainer disputes spill onto the platform	Medium	Medium	Clear client-ownership classification and agreement records (§6.11, §9.6)	Product
R14	WhatsApp pricing or policy changes (e.g. service messages charged from Oct 2026)	High	Low–Medium	Pass-through add-ons; push notifications first; click-to-chat links	Product

17. KPIs and success criteria

17.1 North-star metric

Weekly Active Coached Trainees (WACT): trainees who logged a workout, meal or check-in in the week **and** have an active relationship with a paying Org. It moves only when businesses retain and serve their clients through the platform — the thing that drives both B2B retention and marketplace supply.

17.2 Metrics by area and targets

Area	Metric	L6 target	L12 target	L24 target (base)
North star	WACT	1,200	5,000	20,000
Coach acquisition	New paying coaches / month (Egypt)	26	52	105
Coach activation	% of new coaches with ≥ 3 clients and a program assigned within 14 days	50%	60%	65%
Coach retention	Monthly logo churn (paying)	≤ 6%	≤ 5%	≤ 4%
Coaching quality	Median check-in response time	< 48 h	< 36 h	< 24 h
Coach time saved	Self-reported admin hours saved per week	≥ 3 h	≥ 4 h	≥ 5 h
Gyms	Paying gyms (EG)	—	29	158
Gym retention	Monthly logo churn	—	≤ 3%	≤ 2.5%
Front desk	Check-in time p95 (scan → decision)	—	< 3 s	< 2 s
Gym value	Members with the app installed	—	30%	40%
Trainee engagement	D30 retention of new trainees (clients)	45%	50%	55%
B2C	Plus conversion of organic MAU	—	2%	3%
Marketplace	Lead → purchase conversion	—	—	12%
Marketplace	Refund rate / dispute rate	—	—	< 3% / < 0.5%
Finance	Net MRR	62k	245k	1.23M
Finance	Gross margin	≥ 70%	≥ 72%	≥ 78%
Finance	Net revenue retention (B2B, monthly cohorts, annualised)	—	≥ 90%	≥ 100%
Reliability	API availability (monthly)	99.5%	99.9%	99.9%
Trust	Data-access requests (export/delete) handled in ≤ 7 days	100%	100%	100%

18. Decisions, assumptions and open questions

18.1 Decisions (proposed; founder sign-off needed)

ID	Decision	Reason	Reversibility	Technical ref (TECHNICAL_SYSTEM_ARCHITECTURE.md)
D-01	Beachhead: independent coaches in Egypt; gyms from L7; marketplace from L10; KSA from L16	Fast self-serve revenue + supply for later phases	Medium	§21
D-02	One Person identity + Personal Space; businesses get consented, scoped access	Ownership, privacy law, portability, differentiation	Hard (foundational)	§4, §5
D-03	Data ownership rules in §6.10/ §6.11	Removes the biggest trust conflicts	Medium	§8.4
D-04	Local pricing in EGP/SAR per §7; free coach tier; no free gym tier	Market fit	Easy	§11
D-05	Marketplace: commission only on originated clients (10%), licensed-gateway split (Option A)	Low disintermediation, low licensing exposure	Medium	§12
D-06	No sale of coaching packages or B2B plans inside the mobile apps (Egypt/KSA)	Store rules and fees	Easy	§11.10
D-07	Prepaid billing periods with reminders by default; auto-renew optional	How customers pay	Easy	§11
D-08	Stack: Laravel modular monolith, PostgreSQL, Valkey, Reverb, Nuxt, Flutter	Productivity, talent, founder experience	Hard	§3, ADR-001...004
D-09	AWS eu-central-1 primary, eu-south-1 backups; no Gulf primary region in 2026	Latency vs risk; 2026 Gulf outages	Medium	§13, ADR-006
D-10	AI only as coach-approved drafting, from P4	Safety, data needs	Easy	§24 ADR-012

18.2 Key assumptions to validate (with method)

ID	Assumption	Validate by	When
A-01	Egyptian online coaches average ~18 active clients and charge ~1,000–3,000 EGP/month	30 interviews + survey of 100 coaches	P0
A-02	Coaches will pay 349–799 EGP/month	Founders-offer pre-commitments (≥ 15)	P0
A-03	Gyms struggle to manage PT/freelance trainer revenue	15 gym interviews; design partners	P0, P2
A-04	Gym ARPA ~2,400 EGP achievable	Design-partner conversion at list price	L7–L10
A-05	35% of gym members will use the member app monthly	Design partners	L7–L12

ID	Assumption	Validate by	When
A-06	Marketplace clients accept web checkout	Conversion test	L10
A-07	KSA channel partner at 20% share is available	Partner outreach	L10–L14
A-08	AWS spend ≤ 15% of net revenue from L15 and ≤ 10% from L24 (Technical NFR-16)	Monthly cost review	Ongoing

18.3 Open questions (need an owner and a date)

ID	Question	Owner	Needed by
Q-01	Exact PDPC licences required (controller, sensitive data, cross-border) and timelines; is EU hosting licensable for health data?	Counsel	End of P0
Q-02	Can Paymob/Kashier marketplace products pay out to individual coaches without a commercial register? Fees?	Founder	End of P0
Q-03	VAT and withholding treatment of marketplace commissions and payouts to individuals	Tax advisor	Before P3
Q-04	Are we in scope of ETA e-invoicing/e-receipt from day one for our own SaaS invoices?	Tax advisor	Before L1
Q-05	Minimum retention periods for financial records vs deletion requests (chat, invoices)	Counsel	Before L1
Q-06	Final brand name (trademark in Egypt + KSA, domains, store names)	Founder	P0
Q-07	Exercise video library: produce (cost/time) or license?	Product	P0
Q-08	Local food database source: build with a dietitian vs licence	Product	P0
Q-09	Saudi hosting cell: required by target customers or regulator?	Founder + counsel	L12
Q-10	Professional liability insurance for wellness advice delivered via the platform	Founder	Before L1

Appendix B — Financial model inputs

The model (a short Python script kept with the planning notes; reproducible from this table) runs monthly from L1 to L24.

Input	Value	Note
Build phase	6 months × (senior full-stack 85k + senior Flutter 80k + designer 50% 30k + tools 8k + AWS dev ~8k) + legal 250k = **1.52M EGP**	Founder unpaid during build
Team from L1 (monthly, loaded)	full-stack 85k, Flutter 80k, designer 30k, founder stipend 30k, CS 20k; + gym sales 25k (L6), QA/support engineer 35k (L7), backend 75k (L8), CS #2 20k (L9), engineer 70k + sales #2 25k (L13)	**[ASSUMPTION]** Egyptian market salaries, loaded
Fixed overhead	accounting/legal 15k, tools 8k, brand/content 20k per month; KSA legal/entity 300k one-off at L14	
VAT	Egypt 14% (prices inclusive); KSA B2B exclusive (reverse charge assumed **[VERIFY]**)	
FX	52.5 EGP/USD, 14.0 EGP/SAR	
AWS by MAU	< 5k: $250; < 30k: $1,000; < 100k: $2,300; ≥ 100k: $5,000	Technical §15
Payment processing	60% of SaaS billing by card/wallet at 2.75% + 3 EGP; 40% InstaPay (no fee)	[S23]
WhatsApp utility	0.30 EGP/message; 1.5/member/month (gyms), 2/client/month (coaches)	[S34]
Store fees on Plus	60% bought in-app at 15%	**[VERIFY]** programme eligibility
Marketplace	AOV 1,800 EGP, 10% commission, 20 EGP payout/reconciliation cost per active engagement	
Lean variant	Flutter 80k, freelance designer 15k, CS 20k from L1; sales 25k (L7); backend 75k (L10); CS #2 20k (L13); founder writes backend, no stipend
